Bonneli

CATALOG OF MATTRESSES

About us

The company BONNELI was founded in 2009, and in a relatively short time, from a small family factory, a large company with almost 100 employees was created.

Our main activity is the production of various types of mattresses and the accompanying program, in several factories and plants in our own ownership, (over 20,000 m² of space in Barič, near Belgrade, and another 10,000 m² of production, warehouse, sales and business space in Belgrade and its surroundings). Knowing that a good sleep is the basis of a happy and productive life, and in the desire to offer our customers the best possible product for ideal rest and relaxation, we have become a leader in the production of mattresses in this area, known and recognized for high quality, for products that, with their superior features and performance, best suit you and your individual needs for a healthy and beautiful sleep.

In order to achieve high competitiveness on the world market, we work hard to develop and improve the product range, with the application of the most modern production technology. In our production process, we use only the latest and highest quality materials from renowned global manufacturers. In addition to the careful selection of suppliers, we continuously examine the quality of incoming raw materials and raw materials, while constantly upgrading the quality system in accordance with the requirements of strict European and international standards. Our technologists work closely with ergonomics experts, because we do not stop at existing models, but try to develop better and more comfortable mattresses, expand the range and improve quality and design even more. In addition, our team of experts in the organization of production, logistics, marketing and sales continuously monitors the trends in the world market, all with the aim of adapting as best as possible to the challenges of modern business and to the best possible promotion of our products.

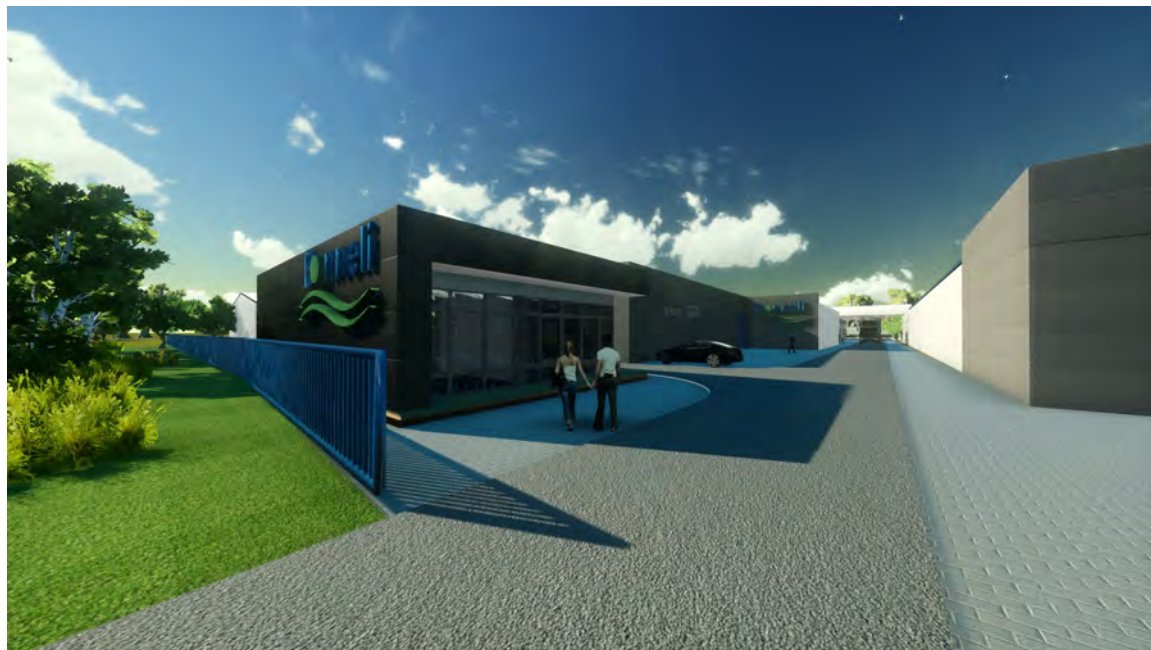

Since 2015, we have become the first factory in the region that produces pocket cores in our own facilities, on the most modern automated machines with a large production capacity. We decided to take this step so that we could best meet the demands, primarily of the foreign market, and follow world trends in the production of products to improve people's sleep. In this way, we have almost completed the entire cycle: technological development, confection of PU foam, own production of pocket and wire cores, continuous monitoring of scientific and technological achievements and modern world trends, use of sophisticated technology and innovative materials, sales and procurement logistics, marketing...

Despite all of the above, knowing full well how important mutual communication is, we are still a company that is open to all suggestions, both from you as our customers, and from people from science and technology. We are, now even more, a company that treats its customers, products, design, quality, healthy sleep and comfort responsibly and with great care, down to the smallest details. Our sales network consists of over 80 sales facilities (both on the territory of Serbia and on the territory of neighboring countries), a large number of which are located in our franchise system.

In addition to our own sales network, we are represented in more than 50 countries around the world, from New York to London, from Berlin to Baghdad, from Athens to Stockholm... but also on the markets of Belgium, the Netherlands, Denmark, Romania, Montenegro, the Czech Republic, Slovakia, Croatia, Slovenia, Bosnia and Herzegovina, Macedonia, England, Israel, Austria, Italy, Hungary, France, Bulgaria... In a short time, over 1,200,000 homes in the world use BONNELI products.

Find out why so many people put their trust in us, try the BONNELI mattress for yourself.

Production facility on 20.000 m²

Choosing a mattress for healthy sleep

We know what healthy sleep means and how important and necessary it is for good health and improving the quality of life. A healthy sleep refreshes us and regenerates the organism more than any other biological process. We know that a healthy, harmonious, deep and relaxing sleep is a basic prerequisite for the health of the body and for our normal daily functioning.

A good and healthy sleep means quality relaxation and rest, a good and healthy sleep strengthens and rejuvenates, restores the ability to concentrate, stimulates the spirit and restores lost energy.

We also know that every person is different, and that there is no universal mattress that fits everyone. Whether the mattress is soft or hard enough, more or less comfortable, is the personal perception and feeling of each individual. The ideal mattress is the one that best meets your personal and specific needs for comfort and relaxation.

The basic prerequisite for a healthy and good sleep is a quality mattress that will best suit your body, habits, lifestyle and individual needs of each individual. A good mattress is one that provides comfortable sleep, that provides a pleasant feeling that occurs when the mattress is optimally adapted to the shape of your body, and the spine takes its natural double "S" shape.

For these reasons, we are developing new and better lines of mattresses that will enable you to enjoy a deep and peaceful sleep.

Our solutions for healthy sleep contain innovations in both technological and medical senses, which not only ensure comfort at the highest level, but also protect your health.

Because a good and high-quality mattress provides you with:

- good mood and optimism;
- better memory and concentration;
- better control of body weight;
- better health; - better sex life;
- lower risk of injuries;
- stronger immunity;
- increased desire for fun and socializing and better interaction with other people;
- reduced risk of diseases;
- greater ability to focus on important things;
- greater physical attractiveness;
- reduction of irritability and hypersensitivity;
- reducing the risk of traffic accidents;
- more success at the workplace;
- personal and family happiness...

Choosing a mattress is an excellent and long-term investment, an investment in your own quality of life, an investment in your home and your future. The choice of mattress is the choice of how the day ahead of you will look like.

If you choose a mattress from the BONNELI assortment, you choose comfort, durability, quality, you choose to wake up completely rested, happier, more satisfied, in a better mood, healthier... you chose to wake up with a smile on your face, ready for a fresh, energetic start of the day.

A close-up photograph of a mattress featuring a pocket core design, where individual springs are encased in fabric pockets. A glass of red wine sits on the left side of the frame, and a person's arm in a light blue shirt is visible on the right. The background is a dense field of white, tufted fabric pockets.

Mattresses with a pocket core

Mattresses with elastic spring cores of high flexibility and durability are the perfect choice for all those who want an incredible feeling when sleeping, for all those who need a peaceful, healthy and invigorating sleep, longer rest and supreme comfort. Thanks to the characteristics that these cores have, mattresses with pocket cores are among the best quality mattresses.

Each spring is independent of each other, and reacts very refined and gently to the pressure of the body. By pressing your body against one spring, the other springs are at rest, which ensures that your body takes the most natural position and its weight is balanced over the entire surface of the mattress.

The pocket core provides additional comfort, ideal orthopedic support and support for the body, especially the spine, and ensures better ergonomic adaptation to the sleeper's body.

Using this mattress, the body has a wonderful feeling of releasing pressure and easing the tension of the muscles on the back, the core adapts extremely precisely to the shape of the body and you can fall into a nice comfortable sleep.

Following the latest world achievements, we have provided for you, in addition to single-zone and 7-zone pocket cores, which brought out the positive features of these cores even more.

In large (double) mattresses, these cores, more than any other, ensure that the turning of one partner does not disturb the other, which provides additional individual comfort.

Exclusive Sonno

EXCLUSIVE SONNO, with its exceptional height, makes getting out of bed easier for all those who have problems with hips and knees. This excellent mattress is a combination of a pocket core of quality construction, highly elastic HR foam 3 cm that goes on both sides, plus 2 cm of quality Sky Cell foam, and even 4 cm of Panthera Special premium foam.

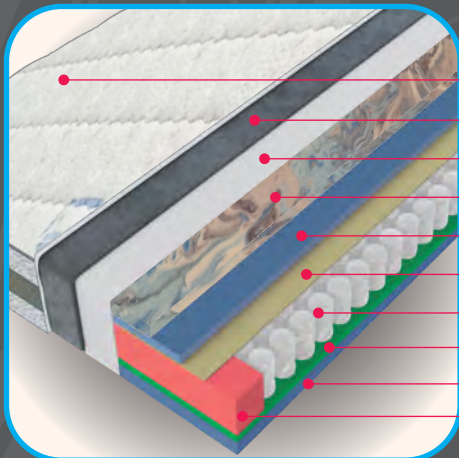

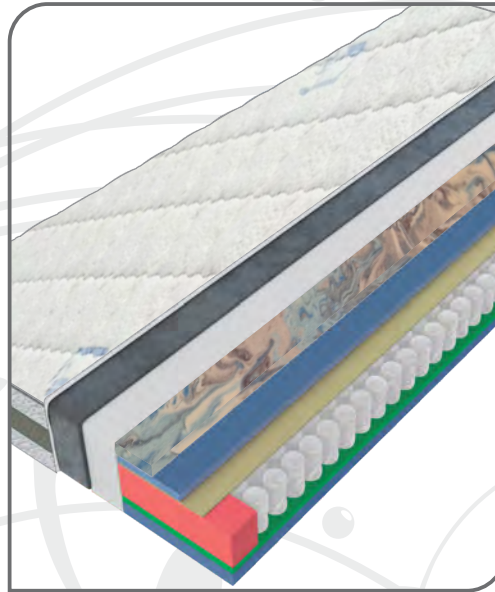

Pantera Premium foam is characterized by exceptional elasticity and resistance, it has a higher density and a special cell structure, so in combination with appropriate zoning, it ensures a reduction in the number of pressure points on the sleeper's body.

What is also very important, this exceptional foam has a high regulation of moisture and heat, that is, it not only improves comfort but is very important for the prevention of decubitus. That's why this superior polyurethane foam is #1 for medical applications.

The Exclusive Sonno mattress has a removable tufted cover that, in addition to PES and viscose, also contains 30% linen.

Linen fibers are natural fibers that allow better air flow and better moisture absorption. This beautiful, comfortable and elegant fabric made of natural fibers is more durable and dust-resistant than other materials, and thanks to its porous structure, linen fabric will help make your sleeping environment ideal even if the days are tropically hot in the summer. The Exclusive Sonno mattress enables a natural and healthy sleep and supports the body exactly where it is needed.

The core of this mattress is a combination of high firmness and strength, while retaining at the same time elasticity and comfort. This mattress gives you the double pleasure of healthy sleep in all positions, because the upper and lower foam have different hardness, which gives the sleeper the ability to choose sleeping comfort according to your personal preferences.

Lavander

LAVANDER mattress based on a double multipocket pocket core of 2 x 10 cm perfectly adapts to the pressure points of the body, the independent pockets that make up the double pocket core give this mattress the characteristics of an anatomically and orthopedically adaptive mattress.

Three layers of HR, PU and Sky Cell foam, of different densities and hardness, placed in the lower, upper and middle parts of the mattress follow these two sophisticated pocket cores with an increased number of springs, which achieves a more sensitive adjustment and support of the individual body line of the sleeper, guaranteeing a peaceful and relaxing sleep without turning during the night. The upper part of the cover is made of luxurious Stretch knit in white, with light purple and gray lettering.

The canvas is treated with lavender extract, a shrub known for its beneficial smell used in the cosmetic and pharmaceutical industry. The lavender extract allows this cover to calm and relax, relieves the feeling of tension in the body and muscles, and emits a pleasant and beautiful scent when touched. At the same time, it has an anti-allergic and antibacterial effect, neutralizes unhealthy and harmful microorganisms and removes negative energy from the sleeper's body.

Non-removable non-stitched cover made of luxurious stretch knits treated with lavender extract. When touching emits a pleasant smell, calms and relaxes, relieves tension in the body and muscles, has an antibacterial and anti allergic effect.

Triton Lux

TRITON compact mattress that provides balanced support for your body, which allows the body to be relieved of pressure and quality rest during sleep. The base consists of a reinforced pocket core of 20 cm height, which provides optimal 'point' support for the body, only loaded springs react to pressure, while the rest remain stationary.

Additional layers of PU foam of 2 cm, on both sides, place the sleeper's body in a correct, anatomically and orthopedically ideal position, reducing surface pressure.

A layer of 3 cm thick memory foam on top gives a feeling of warmth and satisfaction and incomparable comfort during sleep. The 3d Air mesh strip eliminates moisture from the mattress and enables better air circulation inside the mattress.

Royal Dream Lux

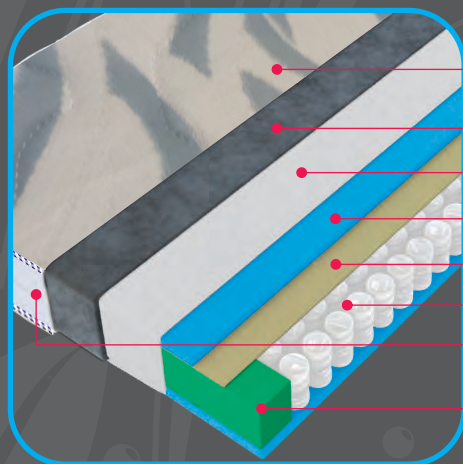

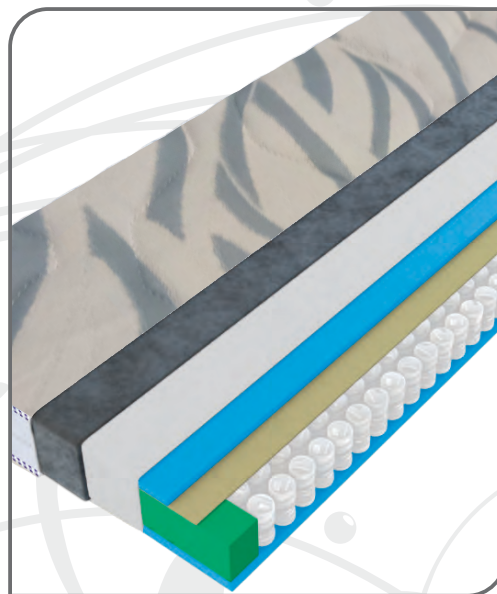

Premium high-performance mattress that provides a beneficial feeling of comfort and the highest degree of comfort, it enables the highest quality of sleep and perfect rest during the night, as a decisive factor for enjoying each new day.

ROYAL DREAM mattress, top anatomical mattress for restoration of body energy, exceptional durability, durability and comfort. With its height, it makes getting out of bed easier, especially for those who have hip and knee problems.

The basis is a pocket core of increased height, it guarantees a long service life of the product, along with features of anatomical adaptability, it reacts perfectly to body pressure and ensures its quality support in all points, especially in the cervical and lumbar spine.

The reinforced pocket core is coated on both sides with 4 cm of compact Sky Cell foam, which retains elasticity and comfort even after years of use and complements the incredible feeling of sleeping.

The mattress cover, treated with antibacterial agents, provides protection against mites, prevents the development of bacteria and mold, and thus increases the quality, durability and durability of the mattress.

Sky Pantera

A reliable and comfortable mattress that supports the body extremely well while sleeping and completely prevents bending the spine, in addition, provides strength, energy and vitality. The perfect mattress for the ideal psychophysical rest, an excellent solution for furnishing hotels, apartments, cottages, hostels....

PREMIUM mattress model, a comfortable and at the same time firm mattress - is a combination of a pocket core with a quality construction 16 cm high, and a hard impregnated ECO FELT placed on both sides of the pocket core.

Over the felt, SKY CELL foam boards of 2 cm each are placed, which provide excellent orthopedic support to the body and enable quality, comfortable and peaceful sleep, without waking up during the night.

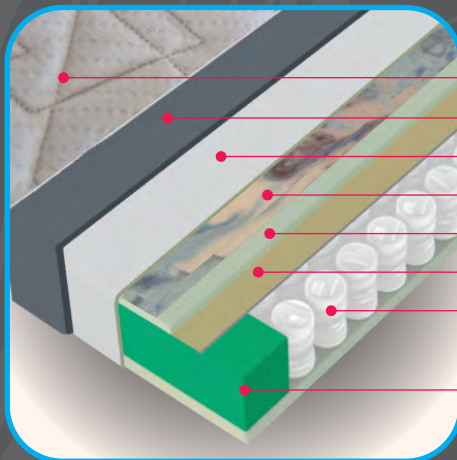

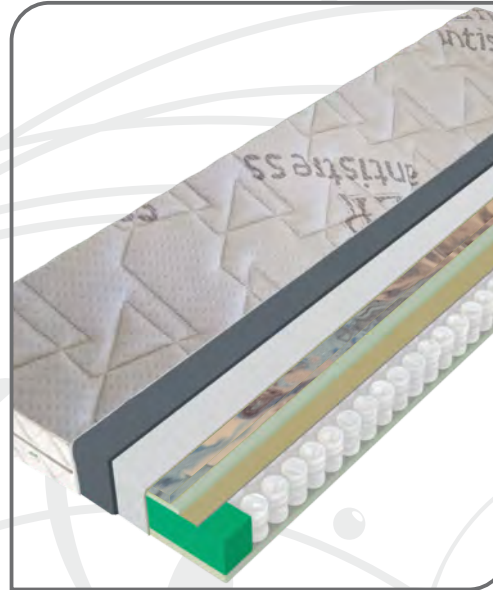

In the upper part of the mattress, high-quality, highly elastic PANTERA foam 3 cm thick, especially high density (50 kg/m³), and with special cell structures, which, combined with appropriate zoning, guarantees a luxurious feeling of sleep and high product quality.

This innovative foam represents the fulfillment of the vision of the world's largest manufacturers of polyurethane foams to create a new generation of sustainable foams, with more renewable materials and less dependence on the petrochemical industry.

One of the most important features of this superior foam is that it not only provides a reduction in the number of pressure points on the body, but also has a very high regulation of moisture and heat - which is extremely important in the prevention of pressure ulcers.

The SKY PANTERA mattress has a removable cover, quilted with coffin and retex, with antibacterial and anti-allergic protection. Contact of the body with this lux knitted fabric activates the function of eliminating allergens, prevents the appearance of harmful bacteria, fungi, mites and the emergence of unpleasant odors.

This mattress gives an incredible feeling and sensibility when sleeping and provides the perfect environment for a wonderful sleep and an even better waking up.

Hera

HERA mattress is made of the highest quality materials to make your bedroom an oasis of healthy and comfortable sleep.

The base consists of a reinforced pocket core with a height of 16 cm, which guarantees a longer life of the product, reacts well to body pressure and provides support for the body in all points, especially in the neck and lumbar region of the spine.

The reinforced pocket core is lined on both sides with high-quality PU foam boards. The upper layer contains 4 cm of foam of increased density, which places the body in a correct, anatomical and orthopedic position, regulating the surface pressure. The bottom layer includes 2 cm of Sky Cell foam, which adapts perfectly to the individual body shape, allowing exceptional relaxation and a high level of comfort.

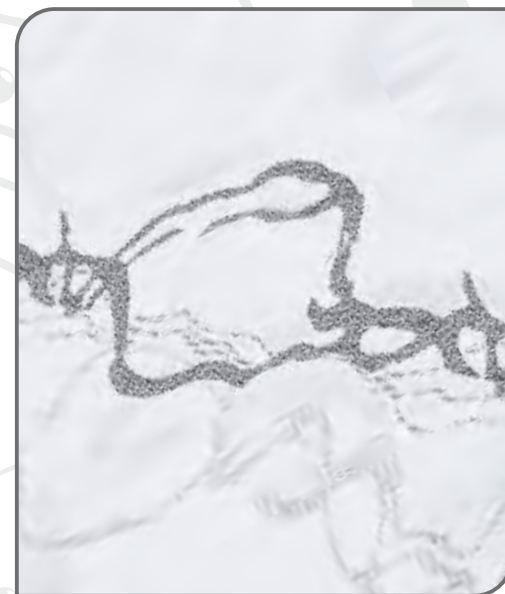

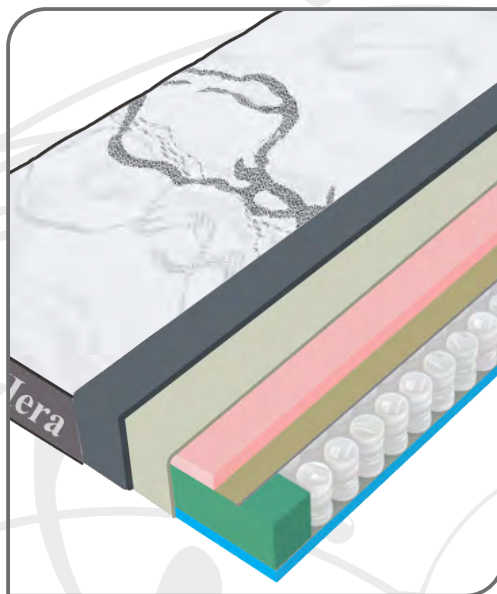

On the upper side of the mattress there is a cover made of luxurious MESI stretch fabric, filled with 300 g of coffin and 1 cm of PU foam, with antibacterial treatment. It is characterized by a gentle structure that allows natural ventilation and creates a superior microclimate for sleeping.

This elegant, comfortable and durable fabric made of natural fibers is more resistant to dust than other materials, and thanks to its structure, it contributes to an ideal sleep even during the summer months with high temperatures.

On the lower (Sky Cell) side of the mattress, there is a cover made of Aloe Vera fabric in white, stitched with 200 g coffin, non-woven textile (retex) and an additional coffin layer (YUFLIN). It protects against bacteria and mites, and removes unwanted odors that can negatively affect health.

Comfort, compactness, strength, durability, safety, reliability...Meet this innovative mattress, perfectly designed to give you the ultimate and ultimate comfortable sleep experience.

A compact mattress that provides balanced support for your body, allowing relief from pressure and quality rest during sleep. An extremely durable and stable mattress that feels great adapts to the contours of the body, while its modern design can be used for a wide variety of purposes, and it is ideal for all types of furnishing and all models of beds and bases.

Sky Orbis

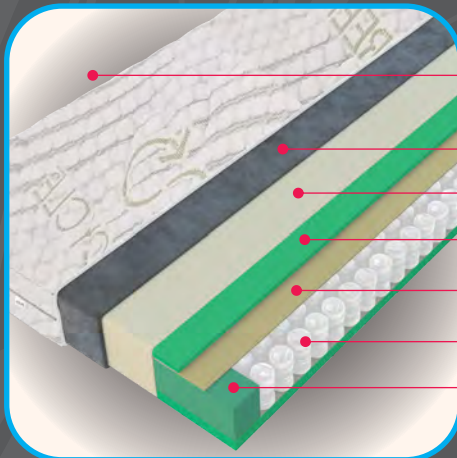

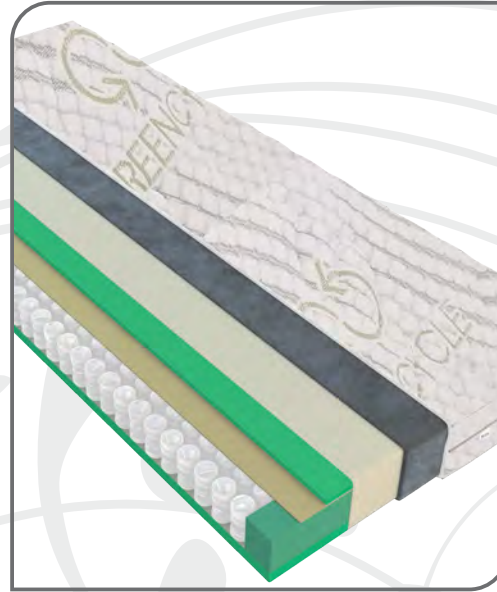

A mattress made of the best and highest quality materials to turn your room into an oasis healthy and comfortable sleep. The incredible sleeping sensation provided by the combination quality pocket core for exceptional anatomical and ergonomic support for your body and innovative and flexible ORBIS PU foams.

SKY ORBIS is the ideal choice for all those who require high-quality relief from the body, supreme comfort and more peaceful sleep, without a lot of tossing and turning. What makes this mattress particularly attractive are the panels of innovative Orbis foam, of higher density and ideal hardness, made of Renuva tm polyol obtained from renewable sources, using H&S technology.

The internal structure of this foam makes it very elastic, and this elasticity is permanently retained by Orbis foam. Using the power of renewable materials, in addition to contributing to the protection and preservation of the environment, this foam provides a feeling of complete comfort and superior comfort.

Today's time and the increasing need to make a greater contribution to the environment and a sustainable world, requires the production of more Eco-cycle products, e.g. (cars, clothes, paper...and more recently, primarily in France, Scandinavian countries, Denmark...and mattresses...). We are proud to point out that the BONNELI company also joins the producers who respect health, ecology and nature.

The SKY ORBIS mattress has a removable quilted Green cycle cover made of a special Q-Dry&Soft knit with highly pronounced hydrophilic properties. The mattress dries faster and easier and is easy to maintain. In addition, this performance-enhanced fabric provides a perfectly gentle and soft touch to the sleeper's body.

Removable tufted greencycle knit coverwoven with a special method of Q-dry&soft technology, 30% obtained from renewable sources, i.e. recycled plastic from the ocean.

Mattresses with a wire core

For all those who favor traditional solutions, who want an orthopedic mattress and a slightly harder sleeping surface, we recommend mattresses that use the classic BONNEL core manufacturing technology. A mattress made in this way has excellent ergonomic properties, it guarantees many years of comfort and stability.

The durability of the product has been extended, better elasticity, compactness and stability of the mattress has been ensured. In addition, the structure of the BONNEL core allows for better breathability because the air flow inside the core is at a much higher level.

The wire cores inside the mattress react progressively, depending on the pressure, first soft, and with the increase of pressure, it becomes harder, which ensures optimal support for the whole body.

In addition to these characteristics, mattresses with a BONNEL core belong to the most economically affordable product in the category, and the very process of their maintenance is also facilitated.

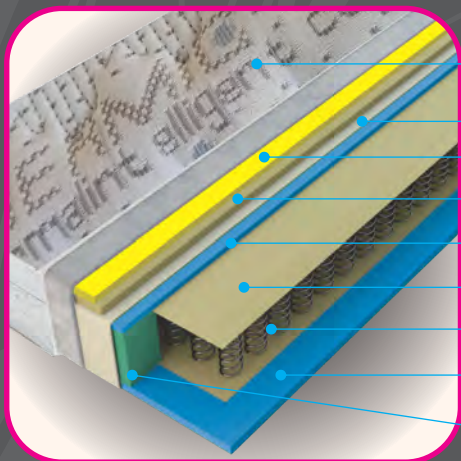

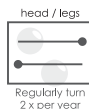

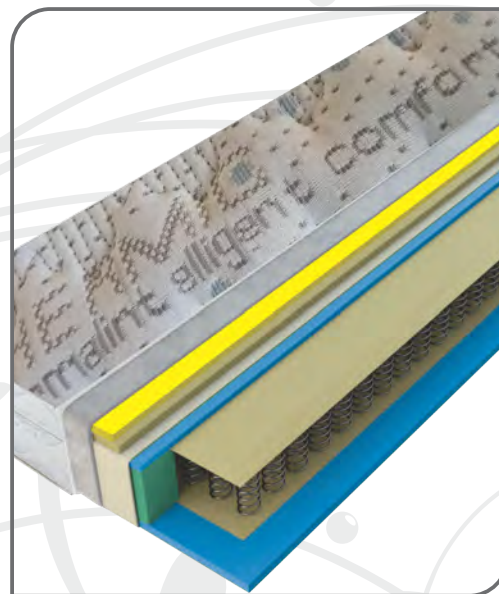

King Memo

The KING MEMO mattress is one of the best quality mattresses with a classic Bonnelli wire core, it belongs to the group of harder elastic mattresses.

It is also ideal for overweight people. The core is made of stronger and better quality steel wire, which has greater resistance, durability and hardness, and is coated with thermoset ecological felt.

In addition to the wire core, this mattress has a panel of Comfort PU foam, 3 cm thick, on the bottom side, while on the top side there are layers of 2 cm Sky Cell foam, 3 cm thick HR foam over it, and finally the top layer consists of 3 cm Memory visco-elastic foam (a foam that perfectly responds to the shape and temperature of the body, does not immediately return to its original position, but settles down under pressure, at the same time providing an amazing and beneficial feeling of comfort and enjoyment in dream). All of these three foams provide the highest degree of comfort and at the same time provide maximum ergonomic and orthopedic support to the body.

Meet this revolutionary mattress, perfectly designed to provide you with the ultimate comfortable sleeping experience.

An affordable solution for various purposes

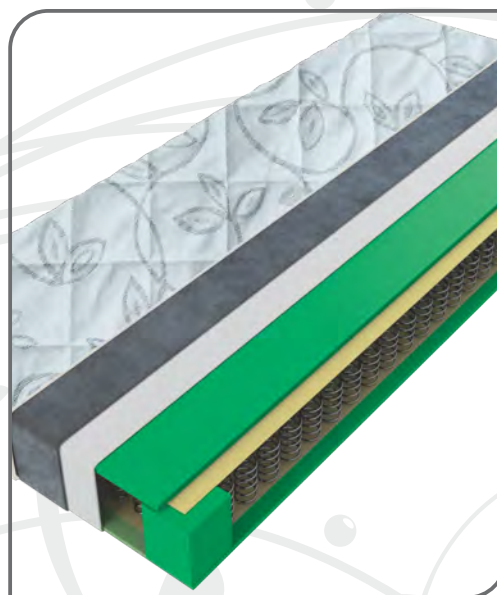

CLASSIC mattress can be described as a softer mattress and a mattress that is primarily intended for people with a lower body weight.

Its basis is the classic Bonelli wire core. The wire core provides as much support and flexibility as your body likes without tiring and straining.

The core is coated on both sides with hard impregnated ecological felt, the body reacts to pressure progressively, first soft, and with increasing load, more and more firm.

The Classic model has 4 cm thick PU foam corner reinforcements. This mattress model has a non-removable tufted cover that has anti-allergic protection and a hem that additionally strengthens the mattress. The composition of the cover is 60% cotton and 40% lycra.

Classic represents a combination of mattresses with a

Foam mattresses

They were created by using one or a combination of several foam materials such as:

- **synthetic polyurethane** or classic foams (PU foam, SKY CELL foam, soft foam);
 - **HIGH RESILIENT (HR)** foam, or cold cast foam. Due to the special open cell structure, this foam has greater surface softness, greater comfort and elasticity, better breathability and moisture conductivity, better body support characteristics and increased durability compared to classic PU foam of the same density and hardness. Due to its structure, this material is also recommended for people who have problems with allergies, since it does not favor the development of bacteria, mold and mites on your bed. It easily and ideally adapts to the individual body shape, ensuring exceptional relaxation and a high level of comfort.
 - **VISCO-ELASTIC FOAM** (known as MEMORY foam), a thick thermo-active foam that reacts to the temperature and pressure of the body and is shaped exactly according to its contours, because it "remembers" its shape and returns after the first lying down to form exactly according to the shape of the body. When lying on this foam, there is an extremely pleasant feeling of releasing the pressure in the body, because no part of the body remains without contact with the material. Foam that gives a feeling of warmth and pleasure, and incomparable comfort during sleep.
 - **LATEX** foam, a naturally adaptable material that ensures optimal orthopedic support for the body in all positions during sleep. The body pressure is evenly distributed, the foam perfectly adapts to the body, which relieves the high pressure points (shoulder, hip and knee area) and thus greatly reduces the jerking and turning of the body during sleep. A type of long-lasting, elastic and airy material that breathes better and releases air humidity faster, keeps us warmer in winter and cools us in summer. Even after prolonged use, it collects much less dust than other materials that are incorporated into mattresses. Extremely resistant and long-lasting material capable of maintaining elasticity and preserving its shape and properties even after long-term use. Foam mattresses can be made from harder foams, when firmness and durability are obtained, or from softer foams, when exceptional surface softness and elasticity are obtained.
- Mattresses made from a combination of higher quality types of foam with a good ratio of density and hardness provide your body with three types of support:
- orthopedic support, when the spinal column is in the correct, natural position while the joints remain relaxed;
 - anatomical support, when the musculature of the body is completely relaxed and proper circulation is ensured without pressure on the blood vessels;
 - ergonomic support, when optimal psychological and emotional comfort is ensured.

Elite Premium

The perfect mattress for ideal psychophysical rest and relaxation. A superb combination high-quality materials of ideal density and hardness.

ELITE PREMIUM mattress is a new mattress in the Bonelli product range, which is one of the best and most elite mattresses on the market.

An excellent choice for all those who like high mattresses, it makes getting out of bed easier for all those who have problems with hips and knees.

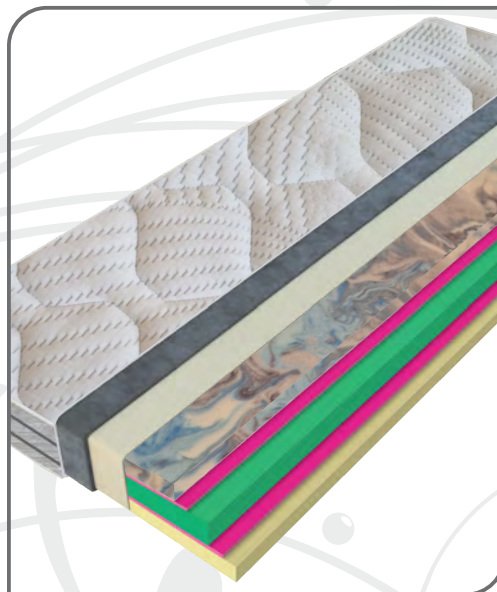

Its exceptional characteristics, durability, superb combination of high-quality materials, ideal density and hardness of the foam in the core, contribute to maximum pleasure and relaxation for the sleeper.

In the middle of the mattress is a 12 cm board of innovative ORBIS foam, which makes this mattress particularly attractive and special. ORBIS foam has a higher density and ideal hardness, it is made of RENUVA™ polyol obtained from renewable sources, using H&S technology

The internal structure of this foam makes it very elastic, and this elasticity is permanently retained by ORBIS foam. Using the power of renewable materials, in addition to contributing to the protection and preservation of the environment, this foam provides a feeling of complete comfort and superior comfort. On both sides of the ORBIS foam, boards made of hard-impregnated eco felt are placed.

Above the eco felt board, 1 cm thick, boards of 3 cm High Resilient foam are placed, which belongs to one of the most modern foams, which, with its unique structure and exceptional relationship between firmness and adaptability, gives your body optimal support.

The mattress, which will delight even the most demanding users, perfectly adapts to the contours of the body, and the high level of breathability ensures a healthy microclimate for a wonderful feeling while sleeping.

Pantera Prime

PANTERA PRIME is one of the best quality and most comfortable mattresses in our entire offer. If you want a harder mattress, where the body is perfectly anatomically and ergonomically supported and relieved in all pressure points while lying down, if you want reliability and safety and a healthy and relaxing sleep... then **PANTERA PRIME** is the right choice for you. **PANTERA PRIME** consists of two types of high-quality, elastic foam, a perfect combination of materials to achieve the comfort you deserve, namely:

- The base of the mattress consists of 16 cm of exclusive and original VH 2840 RED&WHITE foam, of increased density, it provides excellent support for your body, and resistance, long life, elasticity and reliability are its main characteristics. With its structure and quality, this foam meets all the criteria on the basis of which a mattress can be called orthopedic and anatomical, with the basic function of placing your body in a proper and ergonomically acceptable position. - On the upper side of the mattress is the **PANTERA** (added sign) innovative premium foam, which gives firmer and stronger support to the body, is of top performance, and the compactness and firmness of this foam of exceptional density and elasticity is complemented inside the core by profiled channels for better air circulation and relief of body pressure on the mattress, which ensures the feeling of 7-zone profiling. In addition to providing superior comfort, this foam provides excellent moisture and heat regulation and quick recovery of lost energy, while turning your room into an oasis of comfort and sound sleep. The **PANTERA PRIME** mattress has a high-quality tufted removable cover made of LUX stretch knit SWIRL 300, hygienic canvas with antibacterial and anti-allergic protection, modern knitwear that is designed to suit the tastes of both younger and older generations, with a 3-sided zipper for smooth maintenance of the cover's cleanliness (dry cleaning). Contact with the fabric activates the function of eliminating allergens, which drastically reduces the growth and development of harmful bacteria, fungi and mites. It supports the body's thermoregulation by providing excellent breathability and an outstanding absorbent effect.

Memo Pantera

Top-quality double-sided multifunctional and compact mattress, with a perfect combination of materials for comfort and creating the pleasant climate you deserve. One of the best models in the range BONNELI offers, ensures maximum relaxation in harmony with nature

MEMO PANTERA mattress is a PREMIUM mattress and provides the double pleasure of quality and healthy sleep. It is an excellent solution for those who prefer the option of choosing between a harder and a softer sleeping pad, and this effect is achieved by simply rotating the mattress.

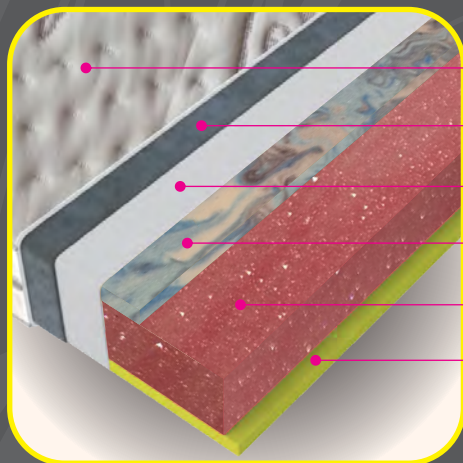

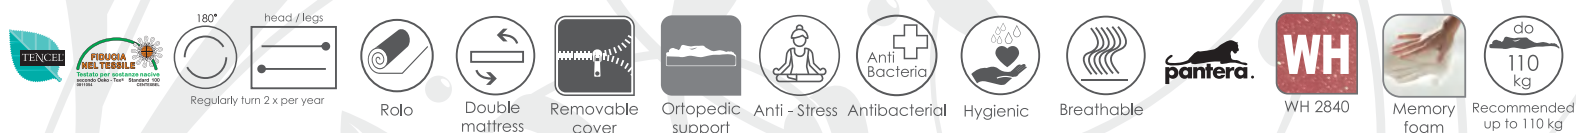

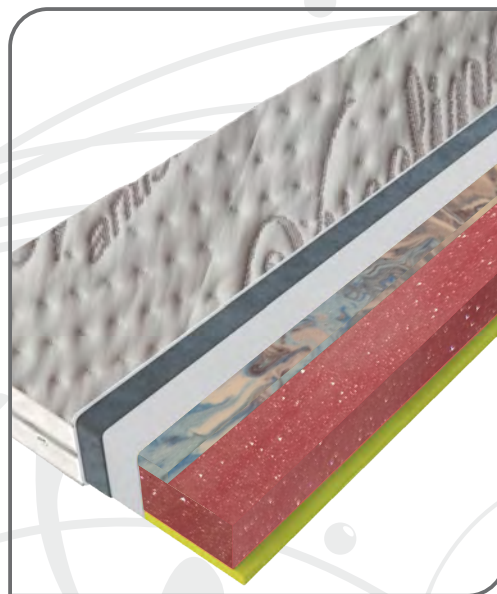

Choose the sleeping comfort according to your personal preferences, the harder PANTERA side provides firmer and stronger support to the body, while the softer MEMORY side quickly and efficiently adapts to the body position and weight of the sleeper. The structure of the mattress consists of 3 types of foam that are used during its production.

- In the middle, there is 14 cm of exclusive and original VH 2840 RED&WHITE foam, whose main characteristics are resistance, elasticity, breathability (thanks to open-type cells that allow better air flow), durability, durability and perfect adaptation to the shape of the body and the position of the spine, in addition, it largely prevents fatigue and back pain.

They make the final layers on the top and bottom

- Recognizable MEMORY foam, which provides stable support, reduces the points of the strongest pressure on the spine while lying down, improves circulation and guarantees sound and natural sleep...while on the opposite side - PANTERA is an innovative and premium foam of top performance, which provides superior comfort and support to the body, ensures moisture and heat regulation, makes it easier to get up and quickly restores lost energy for a fresh and energetic start to a new working day

The MEMO PANTERA mattress has a high-quality removable cover, Viskoline antistress, hygienic canvas with antibacterial and antifungal protection, it actively acts against all types of microorganisms, including house dust mites, which are the primary cause of allergies and skin irritations. In addition, it prevents the appearance of unpleasant odors, absorbs excess moisture, is soft to the touch and has a soothing effect on the skin.

Harmony

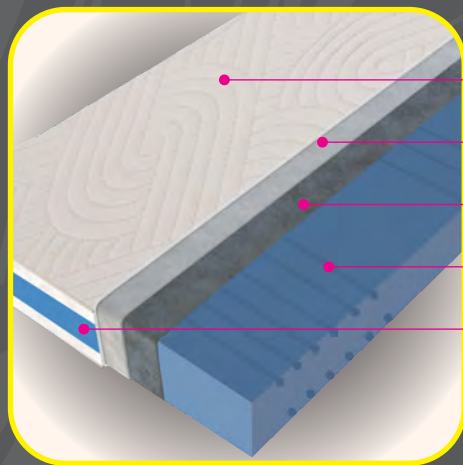

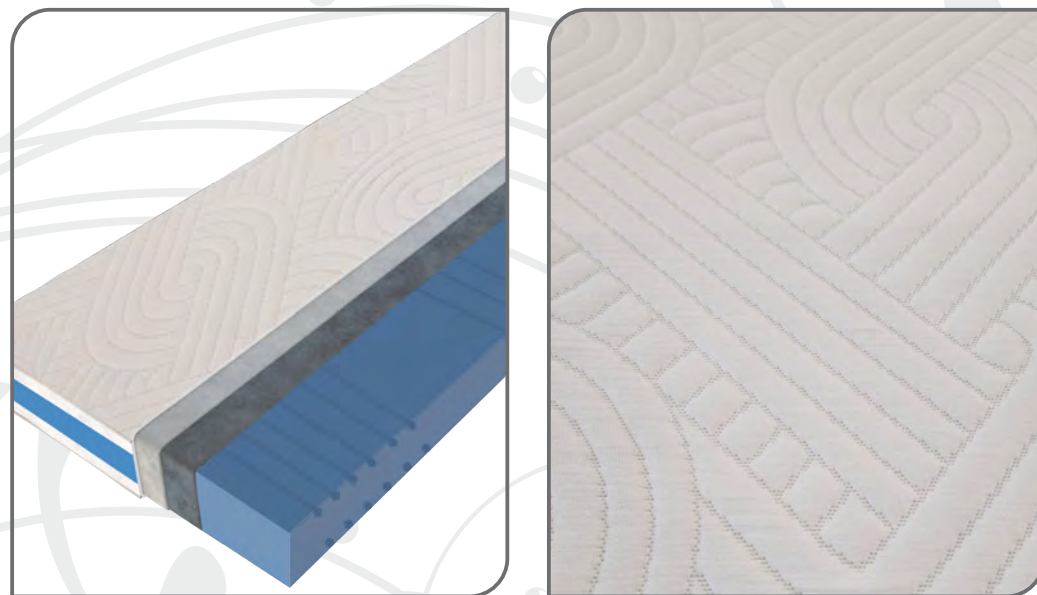

Harmony mattress from the latest Bonnelli mattress collection, has a core of premium 7-zone profiled HR foam, adapts perfectly to the contours of your body, guaranteeing a peaceful, quality and revitalizing sleep.

Thanks to the profiled structures of the lying part of the core, we can say that this mattress is also used in the prevention of pressure ulcers. HR (high resilient) foam is cold-cast foam, a high-quality material, created on the principle of breaking dense foam cells. It provides exceptional elasticity, comfort and adaptability to different body positions, and thanks to the open structures of its cells, HR foam has better breathability and is more durable than standard PU foams.

...The optimal comfort provided by this mattress is enriched by the original cover, whose hygienic aspect and protection from the unwanted effects of harmful bacteria is due to the 350 g stretch knit, made on the basis of Extra fresh treatment. In addition, thanks to the so-called Ecorhythmic treatment of this fabric, the cover gets special properties for accelerated recovery of the body from accumulated daily stress.

The HARMONY mattress is much more than a classic mattress, it is the way to ultimate comfort and regeneration of the body every night.

Mattress made of special HR foam, which has innovative anatomical zones in both the upper and lower layers, it provides personalized support for every part of your body, and thanks to its high elasticity, it provides excellent body support with surface softness and comfort.

Removable cover made of 350 g stretch knit, protects against bacteria, mites and removes unwanted odors, and thus has a positive effect on people's health.

3D Air Mesh strip, in the middle of the sides of the mattress, for a high level of transparency, it enables better exchange of moisture and a healthy microclimate for a beneficial one feeling during sleep.

Flexi Memo

If you want to buy a foam mattress that is not too hard, then FLEXI MEMO is the ideal mattress for you. Flexi Memo is considered a mattress from the golden mean because it is a combination of comfort, quality and affordable price.

Flexi Memo is one of the most popular mattresses, because it represents an excellent combination of mattress hardness and comfort. In terms of hardness, it belongs to the group of medium-hard foam mattresses.

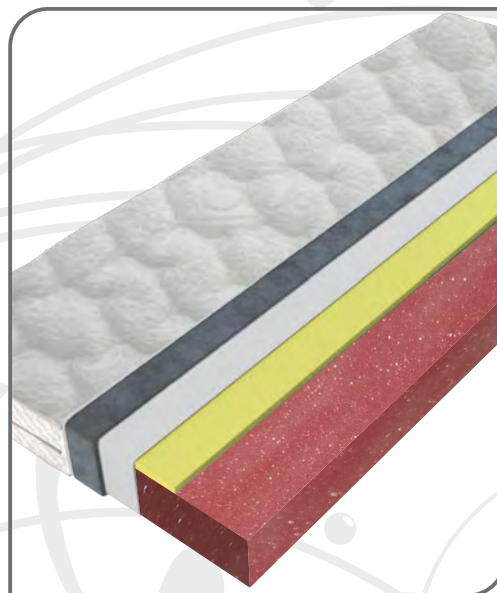

- The base of the mattress consists of 14 cm of exclusive and original VH 2840 RED & WHITE foam, whose main characteristics are resistance, elasticity, breathability (thanks to open-type cells that allow better air flow), durability, durability and perfect adaptation to the shape of the body and the position of the spine, in addition, it largely prevents fatigue and back pain. It has an increased density, and with its structure and quality, it allows the neck and lumbar area not to sink too much into the mattress, while maintaining a high level of comfort.

- On the upper side of the mattress is 3 cm of MEMORY foam, made of millions of small open cells that react to the shape and temperature of the body and promote circulation. It anatomically adapts to the body and does not immediately return to its original position, but settles down under pressure. In addition, this foam has excellent properties for alleviating pain and difficulties after operations, thanks to its anti-decubitus effect, among other things.

FLEXI MEMO has a removable cover with anti-allergy protection, on both sides, made of stretch knit fabric consisting of 70% PES, 20% viscose and 10% silk (a natural material made from fibers of exceptional quality, which are both soft, but also extremely strong and resistant). This canvas enables hygienic and pleasant sleeping, absorbs excess moisture and has a soothing effect on the skin.

FLEXI MEMO is a mattress that will allow you to quickly rest and relax from everyday duties and stress, with an increased level and quality of sleep.

No matter how nice the mattresses look from the outside, their composition, core quality, production technology, durability, comfort and durability...they differ significantly. That is why the FLEXI MEMO mattress is an ideal combination of firmness, comfort and elasticity, a flexible mattress that perfectly molds to the contours of the body and spine. It is recommended for people who are exposed to increased efforts or increased stress during the day

Memory

MEMORY mattress consists of 2 types of foam: Sky cell foam and memory foam.

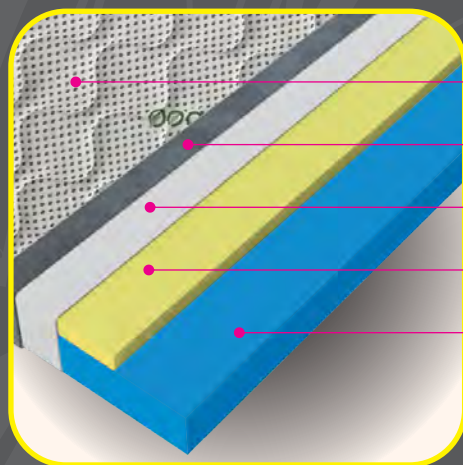

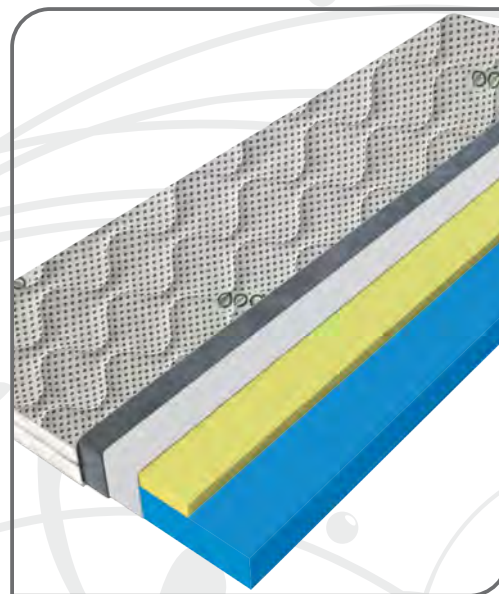

The base of the mattress consists of Sky cell foam at a height of 12 cm. Memory foam is the final layer of this mattress and is placed at a height of 3cm.

By adapting to the body, memory foam is an ideal sleeping surface, relieves pressure in the points of contact between your body and the mattress and enables better circulation. The Memory mattress can be packed in a roll, which makes it very convenient to transport.

The memory mattress has a removable cover and is very practical for maintaining mattress hygiene.

The memory mattress cover has anti-allergic and antibacterial protection. It consists of 80% cotton and 20% polyester, with bamboo fibers that give it exceptional antibacterial properties, an outstanding absorbent effect and excellent breathability.

An excellent mattress that allows extremely precise adaptation to the shape of the body and provides wonderful feeling of comfort and softness. An ideal solution for an extra bed.

Eco Soft

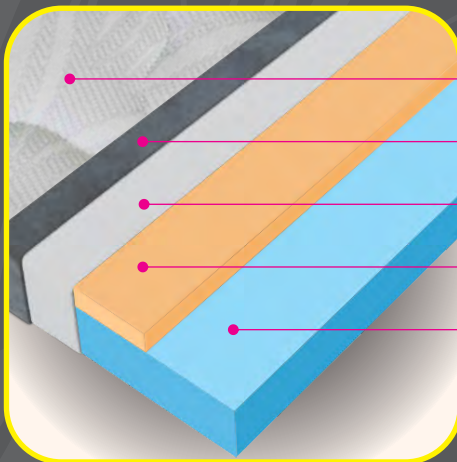

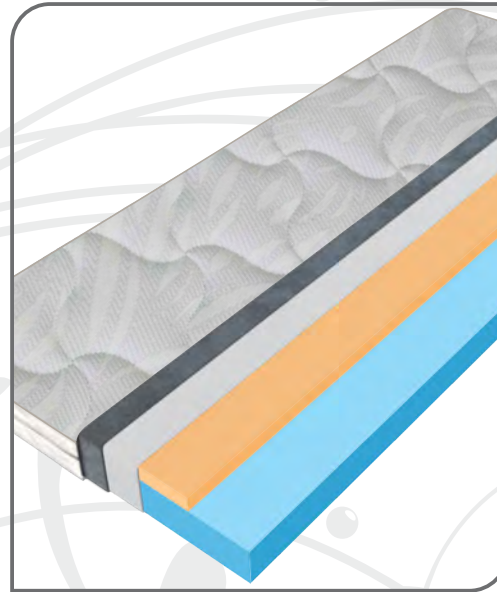

ECO SOFT mattress consists of two types of foam: Comfort foam 14 cm in the lower part, and Soft foam 4 cm in the upper part of the mattress.

Sleeping on the underside of the mattress, where there is polyurethane foam that provides optimal orthopedic support for the body in all positions during sleep, and thanks to its elasticity and density, ensures the sleeper's body exceptional relaxation and a high level of comfort.

Sleeping on the upper side of the mattress, where there is SOFT foam, which provides greater surface softness and comfort, and when sleeping, there are extremely pleasant feelings of pressure relief in the body, and optimal psychological and emotional comfort.

The Eco Soft mattress has a high-quality removable tufted cover that contains anti-allergic and antibacterial protection, which prevents the collection of bacteria and mites. A mattress that offers you excellent quality at a very affordable price.

A mattress made of a combination of high-quality foams with an excellent density ratio and hardness. In the upper part of the mattress is SOFT foam, it provides excellent support body with surface softness and comfort, in the lower part of the mattress, 14 cm Comfort foams of greater density and hardness for superior sleep quality.

POCKET CORE

A more perfect and high-quality form of the core, it consists of springs with a smaller diameter, of which there are significantly more than in BONNEL cores. Each spring is individually sewn into the pockets and then connected to the core. Only loaded springs react to pressure, the core adapts to the body and movements during sleep as much as possible, and every part of the body has adequate support when lying down. This spring system provides the perfect environment for healthy sleep, provides optimal body support and a more restful sleep without much tossing and turning.

7 ZONE CORE

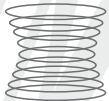

The principle of making multi-zone cores for mattresses was created as a result of the desire for even healthier body support and even more pronounced pressure relief. Ideal zonal support is created for each part of the body, in accordance with its different needs. The seven-zone core is extremely flexible, it has zones of different hardness, the parts where we are heaviest and which press the mattress the most (shoulders, hips, knees) are softer, the spine is perfectly supported and maintains its natural position, which is necessary for a healthy rest. Mattresses with 7-zone cores are especially suitable for people with a sensitive spine, the core gently adapts to the ideal position of your spine and ensures optimal relaxation of the body.

PANTERA PREMIUM FOAM

Innovative and superior foam, fulfilling the vision of the world's largest manufacturers to create a new generation of sustainable foams, with more renewable materials and less dependence on the petrochemical industry. Higher density and with special cell structures, in combination with appropriate zoning, an excellent solution for every mattress. What is perhaps the most important feature of this foam, not only that it provides a reduction in the number of pressure points on the body, and it also has a very high regulation of moisture and heat - which is very important in the prevention of decubitis.

BONNEL CORE

A wire core that provides as much support and flexibility as your body likes, without tiring or discomfort. For the production of springs is used a high-quality patented wire made of tempered steel with high resistance. The wire is 2.2 mm in diameter, the springs are interconnected by spirals with a high degree of flexibility, each spring is specially treated to achieve long-lasting elasticity and protection against breakage.

MEMORY FOAM

Innovative material that adapts to your body and remembers its shape. Material created in the NASA laboratory for the best protection and maximum comfort during space flights. Over time, it gained great popularity as a symbol of extremely healthy and relaxing sleep, the weight of the body is effectively distributed, pressure on the skin is reduced, circulation is improved and the load on the muscles and nervous system is reduced during sleep. It reacts perfectly to the temperature differences (micro climate) between the mattress and the sleeper, it helps you fall asleep quickly because, due to its great thermosensitivity, it adapts extremely precisely and gently to the contours of your body.

ORBIS FOAM

Revolutionary and flexible foam, higher density and ideal hardness, made from RENUVA TM polyol obtained from recycled POST-CONSUMER foam, using H&S technology. The internal structure of this foam makes it very elastic, and ORBIS keeps this elasticity permanently. Using the power of renewable materials, in addition to contributing to the protection and preservation of the environment, this foam provides a feeling of completeness comfort and superior comfort.

PU FOAM

Classic foam that began to be used in mattresses more than 40 years ago. In order to improve the quality of this material, new technological solutions are found in the processing and shaping of this foam, by adding various channels to increase the conductivity of air and moisture. PU foam belongs to foams with high technological characteristics and provides excellent support for your body..

SKY CELL FOAM

A type of polyurethane foam with open cells, created by a special technology, foam that is more durable and resistant to mechanical influences. The open cell system allows fresh air to pass through continuously and thus ensures continuous ventilation and a healthy climate for the sleeper. Thanks to these properties of SKY CELL Foam, vapors are not retained in the mattress, microorganisms, mites, mold and dust cannot develop in it, so a healthy sleep is guaranteed during the entire period of use.

HIGH RESILIENT FOAM

High-performance material characterized by high elasticity, exceptional tenacity and durability. A material with an exceptional ratio between strength and adaptability, resistant to any physical deformations. Thanks to its properties, primarily because of its strength and stability, it is also suitable for people with a higher body weight. One of the most modern types of foam, with its unique structure, a combination of unique anatomical support and comfort, gives the body optimal support, enables healthy sleep and guarantees the greatest possible comfort. Due to its special production technology and special cell structure, this foam is extremely elastic, provides much stronger support and distributes pressure more evenly, ensuring an ideal distribution of density and hardness.

WH 2840

WH 2840

Innovative, high-quality and attractive foam, with significantly better performance compared to the best types of standard polyurethane foams. This type of foam has increased density (28 kg/m³), durability, significantly better elasticity, and in addition, it has an open structure so through the foam air flows freely, which gives the mattress exceptional breathability. Thanks to the special polymer polyol and silicone, and the lower % TDI in the foam, the smell is significantly reduced, in addition, it perfectly adapts to the body, it is hygienic and anti-allergic"

3D FILTER 3D

Filter ecological fabric, improves air flow, prevents condensation and neutralizes heat.

ECOFILC

Ecological and completely healthy evolution of felt. ECOFILC is made from completely new, certified materials.

YUFLIN

Technology of special siliconized polyester fibers that make your mattress more comfortable.

ALOE VERA

The canvas, which contains essential oils of aloe vera, has an antibacterial effect and improves the functioning of the immune system. Due to the reaction to body heat, the positive properties of this miraculous plant come to the fore, the skin is renewed, rejuvenated and kept naturally moist. Aloe vera also has anti-inflammatory properties, has an anti-stress and soothing effect on the skin.

COCONUT BOARD

A natural material consisting of compressed coconut fiber soaked in Latex. Thus, their greater elasticity is achieved, and at the same time increases durability and durability, which makes them a perfect covering for the pocket core.

WOLL

Wool fibers are very resistant and strong, biodegradable and ecologically sustainable, so they also have the property of natural fire resistance. The material, which is naturally resistant to bacteria, has hypoallergenic properties and, in addition, the ability to provide high thermal insulation and moisture absorption.

COTTON

A completely natural plant fiber, absorbs moisture extremely well, and is also characterized by high resistance to bacteria, durability and easy maintenance. It provides a feeling of freshness to the sleeper's body, provides a relaxing environment and significantly improves the quality of sleep.

Q-DRY&SOFT TECHNOLOGY FOR MAKING CANVAS

The technology that provides stretch knitwear with superior quality and a perfect sleeping environment, at the same time makes the fabric softer, more elastic and softer to the touch. The canvas acquires the property of high hydrophilicity, the moisture is dispersed on a larger surface so that the canvas is wiped and dries more easily.

TENCEL FIBERS

Tencel fibers are natural cellulose fibers produced from the core of the eucalyptus tree. They have significantly greater strength and durability than cotton, while being as soft as silk and as delicate and airy as linen. These are natural antibacterial fibers resistant to the development of mites and microorganisms, and are especially suitable for people with sensitive skin. Tencel knitted fabric made of these fibers conducts moisture well and provides the skin with greater freshness and better breathing.

OEKO-TEX STANDARD

A strict certificate that guarantees that the fabric has been tested according to the highest European standards and confirmed as harmless and suitable for human use.
