CATALOG OF MATTRESSES

About us

The company **BONNELI** was founded in 2009, and in a relatively short amount of time, from a small family factory, a large company with almost 100 employees was created.

Our main focus is the production of various types of mattresses and the accompanying program, in several factories and plants in our own ownership, (over 20,000 m² of space in Barič, just outside of Belgrade).

Knowing that a good sleep is the basis of a happy and productive life, and in the desire to offer our customers the best possible product for ideal rest and relaxation, we have become a leader in the production of mattresses in these regions, known and recognized for high quality, for products that with their superior characteristics and performance best suited to you and your individual needs for healthy and beautiful sleep.

In order to achieve high competitiveness on the world market, we work hard to develop and improve the product assortment, with the use of modern production technology. In our production process, we use only the latest and highest quality materials from prestigious global manufacturers. In addition to the careful selection of suppliers, we continuously examine the quality of incoming raw materials, while constantly upgrading the system quality in accordance with the requirements of strict European and international standards. Our technologists work closely with ergonomics experts, because we do not stop at existing models, but try to develop better and more comfortable mattresses, expand the assortment and improve quality and design even more. Other than that, our team of experts in the organization of production, logistics, marketing and sales continuously monitors the movements in the world market, all with the goal of adapting as well as possible to the challenges of modern business and to the best possible promotion of our products.

Starting in 2015, we became the first factory in the region to produce pocket cores in our own facilities, on the most modern automated machines with a large production capacity. We decided to take this step so that we could best meet the requests, primarily of the foreign market, and follow world trends in the production of products to improve people's sleep. In this way, we have almost completed the entire cycle: technological development, confection of PU foam, own production of pocket and wire cores, continuous monitoring of scientific and technological achievements and modern world trends, use of sophisticated technology and innovative materials, sales and procurement logistics, marketing...

With all that has been stated, knowing full well how important mutual communication is, we are still a company that is open to all suggestions, both from you as our customers, and from people from science and technology. We are, now even more, a company that treats its customers, products, design, quality, healthy sleep and comfort responsibly and with great care, down to the smallest details. Our sales network consists of over 80 sales facilities (both on the territory of Serbia and on the territory of neighboring countries), a large number of which are located in our franchise system.

In addition to our own sales network, we are represented in more than 50 countries around the world, from New York to Moscow, from Berlin to Baghdad, from Athens to Stockholm...but also on the markets of Belgium, Netherlands, Denmark, Romania, Montenegro, the Czech Republic, Slovakia, Croatia, Slovenia, Bosnia and Herzegovina, Macedonia, Austria, Italy, Hungary, France, Bulgaria ... In a short time, over 1.200.000 homes in the world use BONNELI products.

Find out why so many people put their trust in us, try the **BONNELI** mattress yourself.

Production facility on 20.000 m²

Choosing a mattress for healthy sleep

We know what healthy sleep means and how important and necessary it is for good health and improving the quality of life. A healthy sleep refreshes us and regenerates the organism more than any other biological process. We know that a healthy, harmonious, deep and relaxing sleep is a basic prerequisite for the health of the body and for our normal daily functioning.

A good and healthy sleep means quality relaxation and rest, a good and healthy sleep strengthens and rejuvenates, restores the ability to concentrate, stimulates the spirit and restores lost energy.

We also know that every person is different, and that there is no universal mattress that fits everyone. Whether the mattress is soft or hard enough, more or less comfortable, is the personal perception and feeling of each individual. The ideal mattress is the one that best meets your personal and specific needs for comfort and relaxation.

The basic prerequisite for a healthy and good sleep is a quality mattress that will best suit your body, habits, lifestyle and individual needs of each individual. A good mattress is one that provides comfortable sleep, that provides a pleasant feeling that occurs when the mattress is optimally adapted to the shape of your body, and the spine takes its natural double "S" shape.

For these reasons, we are developing new and better lines of mattresses that will enable you to enjoy a deep and peaceful sleep.

Our solutions for healthy sleep contain innovations in both technological and medical senses, which not only ensure comfort at the highest level, but also protect your health.

Because a good and high-quality mattress provides you with:

- good mood and optimism;
- better memory and concentration;
- better control of body weight;
- better health; - better sex life;
- lower risk of injuries;
- stronger immunity;
- increased desire for fun and socializing and better interaction with other people;
- reduced risk of diseases;
- greater ability to focus on important things;
- greater physical attractiveness;
- reduction of irritability and hypersensitivity;
- reducing the risk of traffic accidents;
- more success at the workplace;
- personal and family happiness...

Choosing a mattress is an excellent and long-term investment, an investment in your own quality of life, an investment in your home and your future. The choice of mattress is the choice of how the day ahead of you will look like.

If you choose a mattress from the BONNELI assortment, you choose comfort, durability, quality, you choose to wake up completely rested, happier, more satisfied, in a better mood, healthier... you chose to wake up with a smile on your face, ready for a fresh, energetic start of the day.

A glass of red wine sits on a mattress with a pocket core. The mattress is covered in white, tufted springs. A person's arm in a light blue shirt is visible on the right side of the frame. The background is a close-up of the mattress's pocket core structure.

Mattresses with a pocket core

Mattresses with elastic spring cores of high flexibility and durability are the perfect choice for all those who want an incredible feeling when sleeping, for all those who need a peaceful, healthy and invigorating sleep, longer rest and supreme comfort. Thanks to the characteristics that these cores have, mattresses with pocket cores are among the best quality mattresses.

Each spring is independent of each other, and reacts very refined and gently to the pressure of the body. By pressing your body against one spring, the other springs are at rest, which ensures that your body takes the most natural position and its weight is balanced over the entire surface of the mattress.

The pocket core provides additional comfort, ideal orthopedic support and support for the body, especially the spine, and ensures better ergonomic adaptation to the sleeper's body.

Using this mattress, the body has a wonderful feeling of releasing pressure and easing the tension of the muscles on the back, the core adapts extremely precisely to the shape of the body and you can fall into a nice comfortable sleep.

Following the latest world achievements, we have provided for you, in addition to single-zone and 7-zone pocket cores, which brought out the positive features of these cores even more.

In large (double) mattresses, these cores, more than any other, ensure that the turning of one partner does not disturb the other, which provides additional individual comfort.

Exclusive

The **EXCLUSIVE** mattress is the ideal choice for all those who like very high mattresses. Its exceptional height makes getting out of bed easier for all those who have problems with hips and knees.

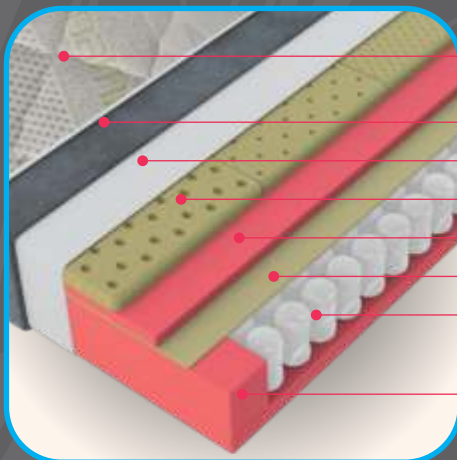

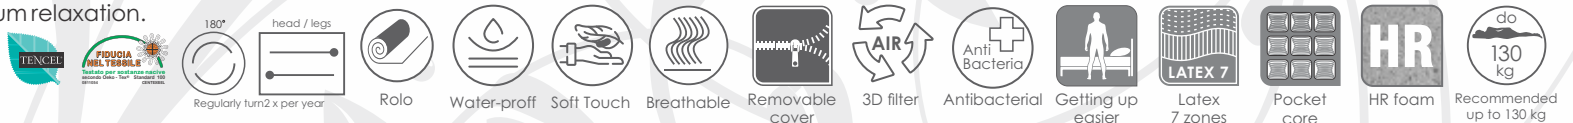

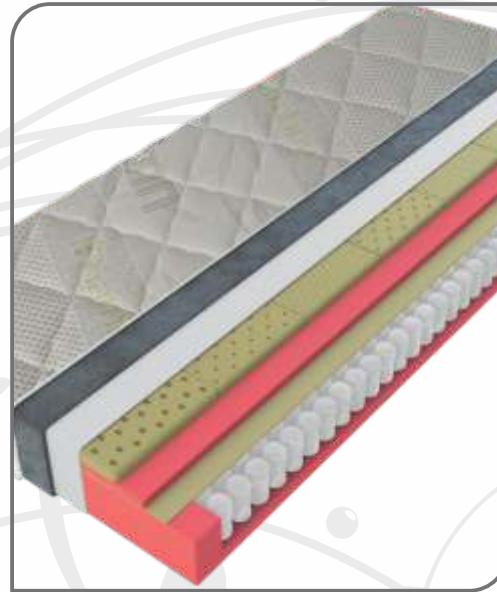

This excellent mattress is a combination of a pocket core of quality construction, HR foam and even 7 cm of latex with 7 hardness zones, which provides you with superior comfort. The Exclusive mattress fully adapts to your body with reduced back pressure on the body and therefore enables a natural and healthy sleep. Your body is supported exactly where it is needed which relieves back, neck and hip pain.

Siliconized fibers enable optimal temperature exchange between the body and the mattress, making sleep more pleasant.

When making the Exclusive mattress, a combination of materials was used that allows for excellent moisture exchange and air conductivity.

The Exclusive mattress has a removable quilted cover with anti-allergic and antibacterial protection, which contains 80% cotton and 20% polyester. Exclusive mattress provides superior comfort and maximum relaxation.

The core of this mattress is a combination of high strength and hardness, while maintaining elasticity and comfort. The mattress encourages relaxation of the back and adapts perfectly to the contours of the body.

Lavander

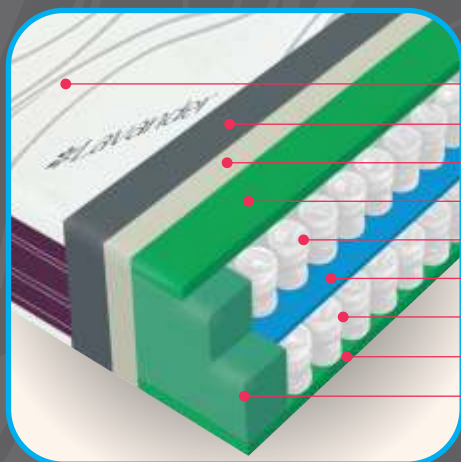

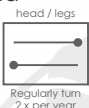

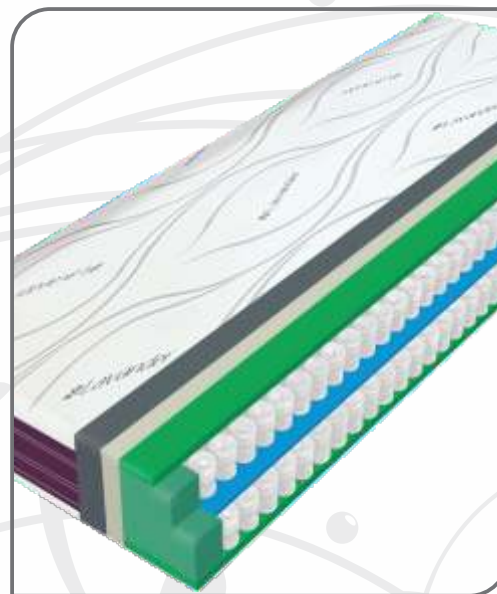

The mattress provides maximum relaxation in harmony with nature. Provides perfect support for lightweight, a deep revitalizing sleep, ensuring a brilliant next day, full of energy and freshness.

LAVANDER mattress based on a 2 x 10 cm pocket core, highly adaptable, the independent pockets that make up the double pocket core give this mattress the characteristics of an anatomically and orthopedically adaptive mattress.

Three layers of PU and SKY CELL foam, of different densities and hardness, placed in the lower, upper and middle parts of the mattress follow these two sophisticated pocket cores with an increased number of springs, which achieves a more sensitive adjustment and support of the individual body line of the sleeper, guaranteeing a peaceful and relaxing sleep without turning during the night.

The upper part of the cover is made of luxurious STRETCH knit in white, with light purple and gray lettering.

The canvas is treated with lavender extract, a plant known for its beneficial smell used in the cosmetic and pharmaceutical industry. The lavender extract allows this cover to calm and relax, relieves the feeling of tension in the body and muscles, and emits a pleasant and beautiful scent when touched. At the same time, it has an anti-allergic and antibacterial effect, neutralizes unhealthy and harmful microorganisms and removes negative energy from the sleeper's body.

Exclusive Sonno

The core of this mattress is a combination of high firmness and strength, while retaining at the same time elasticity and comfort. This mattress gives you the double pleasure of healthy sleep in all positions, because the upper and lower foam have different hardness, which gives the sleeper the ability to choose sleeping comfort according to your personal preferences.

EXCLUSIVE SONNO - excellent mattress is a combination of a pocket core of quality construction, highly elastic HR foam 3 cm that goes on both sides, plus 2 cm of quality Sky Cell foam, and even 4 cm Pantera Special premium foam. Pantera Premium foam is characterized by exceptional elasticity and resistance, it has a higher density and a special cell structure, so in combination with appropriate zoning, it ensures a reduction in the number of pressure points on the sleeper's body. What is also very important, this exceptional foam has a high regulation of moisture and heat, that is, it not only improves comfort but is very important for the prevention of decubitus. That's why this superior polyurethane foam is #1 for medical applications.

Exclusive Sonno mattress has a removable quilted cover, in addition to PES and viscose, also contains 30% linen. Linen fibers are natural fibers that allow better air flow and moisture absorption. This beautiful, comfortable and elegant fabric made of natural fibers is more durable and dust-resistant than other materials, and thanks to its porous structure, linen fabric will help make your sleeping environment ideal even if the days are tropically hot in the summer. Exclusive Sonno mattress reduced back pressure on the body, which enables a natural and healthy sleep, supports the body exactly where it is needed, alleviates or completely eliminates pain in the back, neck and hips.

Triton

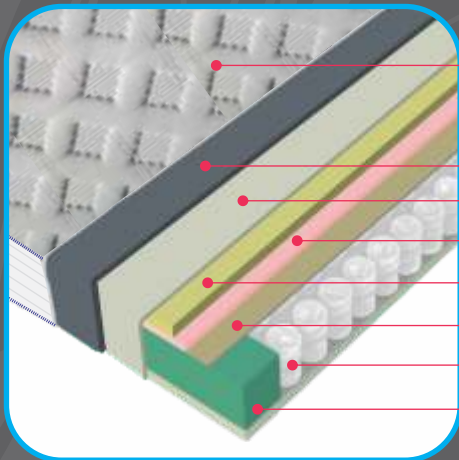

TRITON compact mattress that provides balanced support for your body, which allows the body to be relieved of pressure and quality rest during sleep.

The base consists of a reinforced pocket core with a height of 20 cm, which provides optimal support for the body, only the loaded springs react to pressure, while the rest remain stationary. Additional layers of PU foam of 2 cm, on both sides, place the sleeper's body in a correct, anatomically and orthopedically ideal position, reducing surface pressure. A layer of 3 cm thick memory foam on top gives a feeling of warmth and satisfaction and incomparable comfort during sleep.

The 3d Air mesh strip eliminates moisture from the mattress and enables better air circulation inside the mattress.

Royal Dream

A premium high-performance mattress that provides a beneficial feeling of comfort and the highest degree of comfort, enables top quality sleep and perfect rest during the night, as a crucial factor for enjoying each new day.

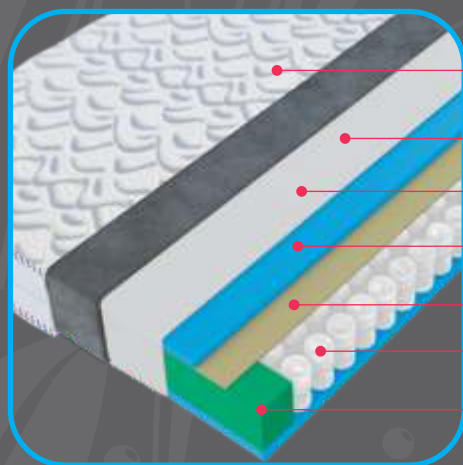

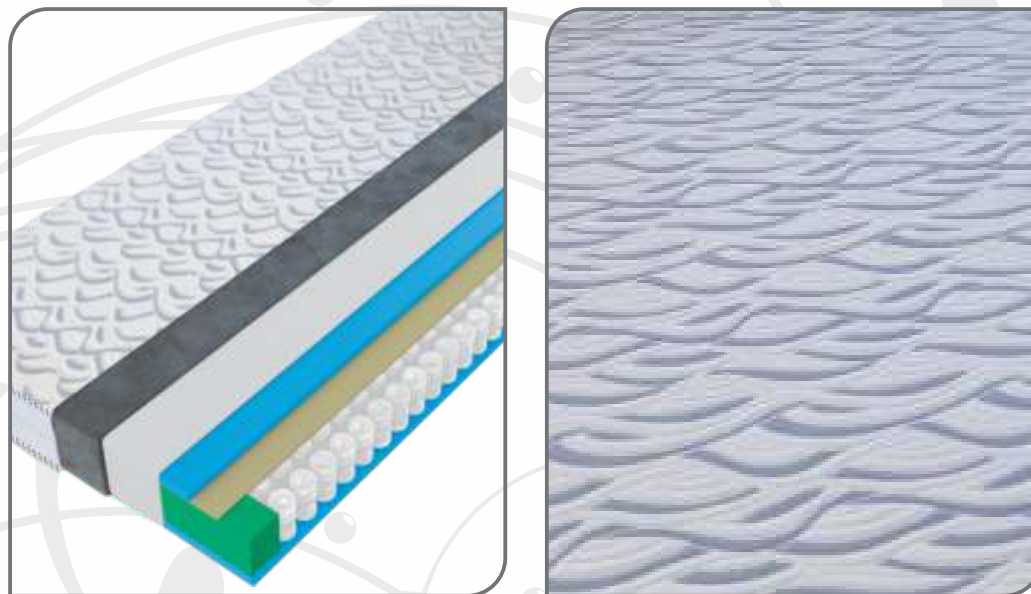

The **ROYAL DREAM** mattress, a superior anatomical mattress for the restoration of body energy, exceptional endurance, durability and comfort.

With its height, it makes getting out of bed easier, especially for those who have problems with their hips and knees.

The basis is a pocket core of increased height, it guarantees a long life of the product, along with the features of anatomical adaptability, it reacts perfectly to ensure its quality support in all points, especially in the neck and lumbar part of the spine.

The reinforced pocket core is coated on both sides with 4 cm of compact SKY CELL foam, which retains elasticity and comfort even after years of use and complements the incredible feeling of sleeping.

The mattress cover, treated with antibacterial agents, provides protection against mites, prevents the development of bacteria and mold, and thus increases the quality, durability and durability of the mattress.

- Stitched non-removable cover, Italian stretch knit, "natural look" lux quality.
- Antiallergic and Antibacterial cover, 80% cotton 20% polyester

Sky Orbis

A mattress made of the best and highest quality materials to turn your room into an oasis healthy and comfortable sleep. The incredible sleeping sensation provided by the combination quality pocket core for exceptional anatomical and ergonomic support for your body and innovative and flexible ORBIS PU foams.

SKY ORBIS is the ideal choice for all those who require high-quality relief from the body, supreme comfort and more peaceful sleep, makes this mattress particularly attractive and special are the panels of innovative Orbis foam, of higher density and ideal hardness, made of Renuva™ polyol obtained from renewable resources, using H&S technology. The internal structure of this foam makes it very elastic, and this elasticity is permanently retained by Orbis foam. Using the power of renewable materials, in addition to contributing to the protection and preservation of the environment, this foam provides a feeling of superior comfort. Today's time and the increasing need to give a greater contribution to the environment and a sustainable world requires the production of a hundred more Eco-cycle products, e.g. (cars, clothes, paper...and in recent times, above all in France, Scandinavian countries, Denmark...and mattresses...)...We are proud to point out that the company BONNELI joins the producers who respect health, ecology and nature.

SKY ORBIS mattress has a removable Greencycle quilted cover, made of a special Q-Dry&Soft knitted fabric with highly pronounced hydrophilic properties, which enables better dispersion of moisture on a larger canvas surface, the mattress dries faster. In addition, this performance-enhanced fabric provides a perfectly gentle and soft touch to the sleeper's body.

Stitched removable cover from greencycle knited fabric using a special method of Q-dry&soft technology, 30% obtained from renewevable sources, that is, from recycling ocean's plastic

Sky Memory

The mattress is an excellent choice for any bed as it provides enough support with the superior comfort of memory foam. Memory foam "remembers" the shape of the body and molds to it, proven to improve blood circulation during sleep.

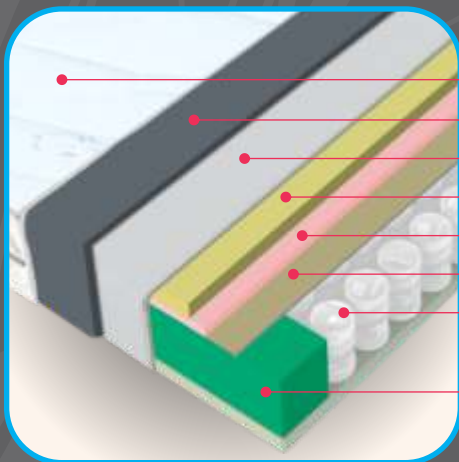

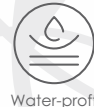

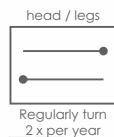

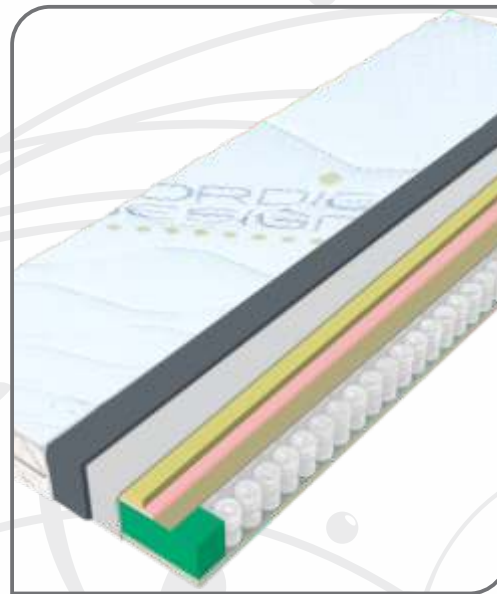

The **SKY MEMORY** mattress is an ideal combined **pocket core** and **memory foam** for a comfortable sleep with proper body support.

The Sky Memory mattress allows you to have a deeper and better sleep and reduces the probability of waking up during the night.

The memory foam in the top layer is made of millions of small open cells that respond to the shape and temperature of the body.

It is extremely anatomically adaptable, it does not immediately return to its original position, but settles down under pressure.

The Sky Memory mattress has a removable quilted cover with anti-allergic and antibacterial protection that contains 80% cotton and 20% polyester.

Demetra

The **DEMETRA** mattress is a PREMIUM multifunctional double-sided mattress.

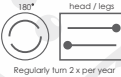

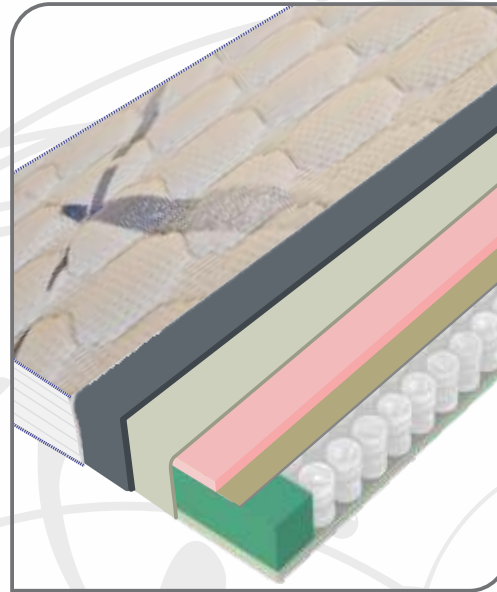

The upper, softer side is with HIGH RESILIENT foam, a high-quality material with emphasized ergonomic-orthopedic properties... it ensures excellent body support, thanks to the achieved high elasticity based on the open cell structure. This foam has greater surface softness, greater comfort and elasticity, better breathability and better moisture conductivity, better body support characteristics and increased durability and stability compared to standard foams.

Another, slightly harder sleeping pad, which contains SKY CELL foam of increased density, provides optimal support for the body, greater bed hardness and quality, revitalizing and relaxing sleep.

On the upper (HR) side of the mattress is a cover made of 300 gr sintetic wadding and 1 cm PU foam exfoliation, treated with antibacterial agents, characterized by a gentle structure that provides natural airiness and ensures a superior sleep microclimate.

On the lower (SKY CELL) side of the mattress, there is a cover also stitched with 300 g cofin and 1 cm PU foam peeling, it protects against bacteria and mites and removes unwanted odors that negatively affect human health.

A quality choice for people with different sleeping habits, a mattress that offers the right answer even for the most demanding sleepers. The mattress is compact and an ideal solution for those who choose between a hard and a softer sleeping surface.

Mattresses with a wire core

For all those who favor traditional solutions, who want an orthopedic mattress and a slightly harder sleeping surface, we recommend mattresses that use the classic BONNEL core manufacturing technology. A mattress made in this way has excellent ergonomic properties, it guarantees many years of comfort and stability.

The durability of the product has been extended, better elasticity, compactness and stability of the mattress has been ensured. In addition, the structure of the BONNEL core allows for better breathability because the air flow inside the core is at a much higher level.

The wire cores inside the mattress react progressively, depending on the pressure, first soft, and with the increase of pressure, it becomes harder, which ensures optimal support for the whole body.

In addition to these characteristics, mattresses with a BONNELLI core belong to the most economically affordable product in the category, and the very process of their maintenance is also facilitated.

King Memo

The **KING MEMO** mattress is one of the best quality mattresses with a classic BONNELLI wire core, it belongs to the group of harder elastic mattresses, it is also ideal for people with increased body weight.

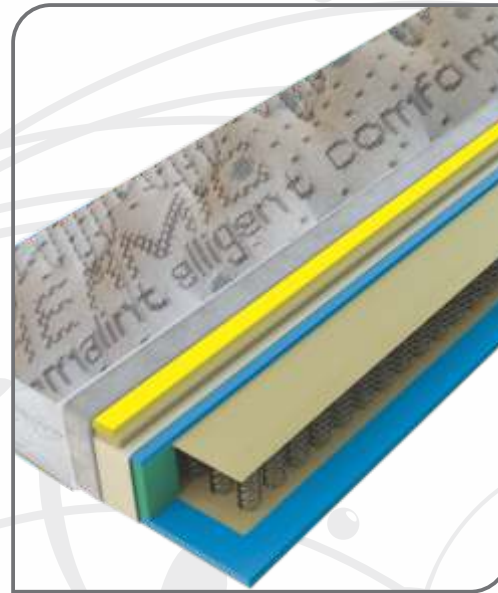

The core is made of stronger and better-quality steel wire, which has greater resistance, stability and hardness, and is covered with thermo-fixed ecological felt, which provides a firm and at the same time gentle foundation for a harmonious and healthy sleep.

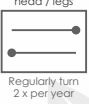

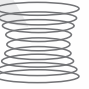

In addition to the wire core, this mattress has a panel of COMFORT PU foam, 3 cm thick, on the bottom side, while on the upper side, in layers, SKY CELL foam, 2 cm thick, is placed on top of it, HR foam 3 cm thick (high density foam, which retains elasticity and comfort even after years of use, has open type cells that allow better air flow), and finally, the top layer consists of 3 cm of MEMORY visco-elastic foam (a foam that responds perfectly to the shape and body temperature, it does not immediately return to its original position, but calms down under pressure, at the same time providing an amazing and beneficial feeling of comfort and enjoyment in sleep).

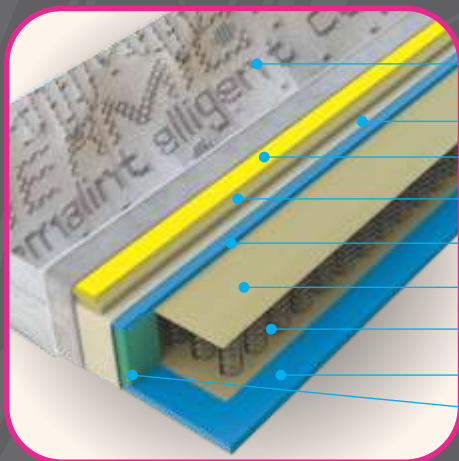

All of these three foams provide the highest level of comfort while providing maximum ergonomic and orthopedic support to the body, providing strength to withstand greater and stronger loads.

Meet this revolutionary mattress, perfectly designed to provide you with the ultimate comfortable sleeping experience.

Comfort, compactness, firmness, durability, durability, safety, reliability... these are all characteristics of this exceptional mattress for your home, as well as for furnishing all categories of hotels, apartments, hostels...

Wollycott 2in1

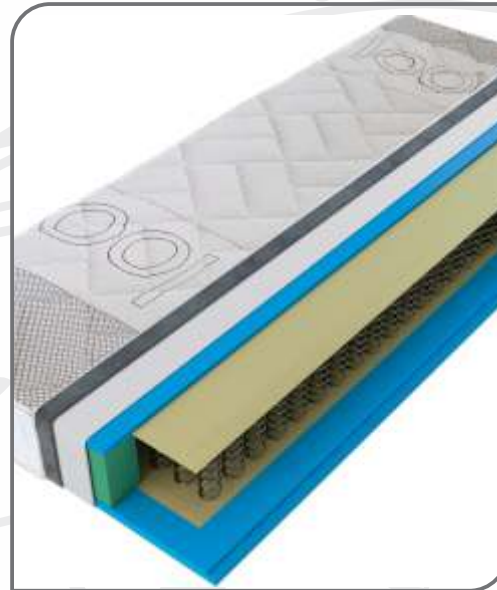

WOLLYCOTT, premium high-performance mattress, for sleepers who prefer natural ones above all materials and supreme comfort. Extremely practical and functional mattress, there is a possibility of using summer or winter sides, depending on user affinity and weather conditions/outside air temperature.

WOLLYCOTT mattress, made on the basis of a reinforced BONNELLI wire core, which provides quality ergonomic adaptation to the body and ensures superior comfort when lying down.

The core of the mattress is coated with ECO felt, which gives additional compactness and firmness to the entire mattress. On each side, the core is coated with 3 cm of highly elastic SKY CELL foam, which, in combination with the core and felt, makes this mattress ideal for fans of traditional sleeping on wire springs. An additional benefit for the sleeper is provided by the SUMMER/WINTER cover, this mattress is double-sided, and intended for all seasons thanks to a special canvas for summer, where on one side there is a canvas that contains COTTON, and on the other side is stretch knitted fabric that contains WOOL.

COTTON - a completely natural plant fiber that is most often used in the production of textile fabrics. Its properties are exceptional moisture absorption, resistance to bacteria, durability and easy maintenance. It provides a pleasant climate for sleeping and prevents the occurrence of unpleasant odors.

WOOL - a natural material that has the ability of high thermal insulation and moisture absorption, has good hypoallergenic properties and provides an ideal sleeping environment, effects of a natural heat regulator. In addition, it is a friendly material that effectively prevents the appearance and development of harmful bacteria, mites and mold.

Foam mattresses

They were created by using one or a combination of several foam materials such as:

- **synthetic polyurethane** or classic foams (PU foam, SKY CELL foam, soft foam);
 - **HIGH RESILIENT (HR)** foam, or cold cast foam. Due to the special open cell structure, this foam has greater surface softness, greater comfort and elasticity, better breathability and moisture conductivity, better body support characteristics and increased durability compared to classic PU foam of the same density and hardness. Due to its structure, this material is also recommended for people who have problems with allergies, since it does not favor the development of bacteria, mold and mites on your bed. It easily and ideally adapts to the individual body shape, ensuring exceptional relaxation and a high level of comfort.
 - **VISCO-ELASTIC FOAM** (known as MEMORY foam), a thick thermo-active foam that reacts to the temperature and pressure of the body and is shaped exactly according to its contours, because it "remembers" its shape and returns after the first lying down to form exactly according to the shape of the body . When lying on this foam, there is an extremely pleasant feeling of releasing the pressure in the body, because no part of the body remains without contact with the material. Foam that gives a feeling of warmth and pleasure, and incomparable comfort during sleep.
 - **LATEX** foam, a naturally adaptable material that ensures optimal orthopedic support for the body in all positions during sleep. The body pressure is evenly distributed, the foam perfectly adapts to the body, which relieves the high pressure points (shoulder, hip and knee area) and thus greatly reduces the jerking and turning of the body during sleep. A type of long-lasting, elastic and airy material that breathes better and releases air humidity faster, keeps us warmer in winter and cools us in summer. Even after prolonged use, it collects much less dust than other materials that are incorporated into mattresses. Extremely resistant and long-lasting material capable of maintaining elasticity and preserving its shape and properties even after long-term use. Foam mattresses can be made from harder foams, when firmness and durability are obtained, or from softer foams, when exceptional surface softness and elasticity are obtained.
- Mattresses made from a combination of higher quality types of foam with a good ratio of density and hardness provide your body with three types of support:
- orthopedic support, when the spinal column is in the correct, natural position while the joints remain relaxed;
 - anatomical support, when the musculature of the body is completely relaxed and proper circulation is ensured without pressure on the blood vessels;
 - ergonomic support, when optimal psychological and emotional comfort is ensured.

Elite

The perfect mattress for ideal psychophysical rest and relaxation. A superior combination of high-quality materials of ideal density and hardness.

The **ELITE** mattress is a new mattress in the BONNELI product assortment, one of the best and most elite mattresses on the market.

An excellent choice for all those who like high mattresses, it makes getting out of bed easier for all those who have problems with hips and knees.

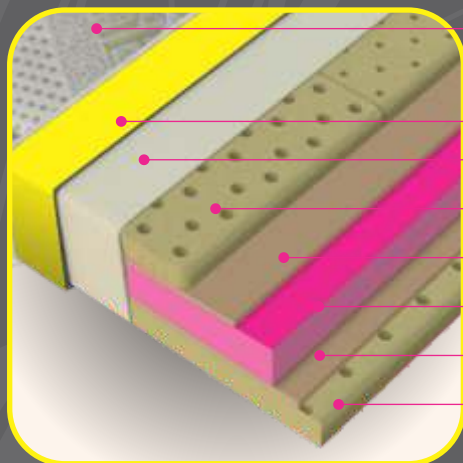

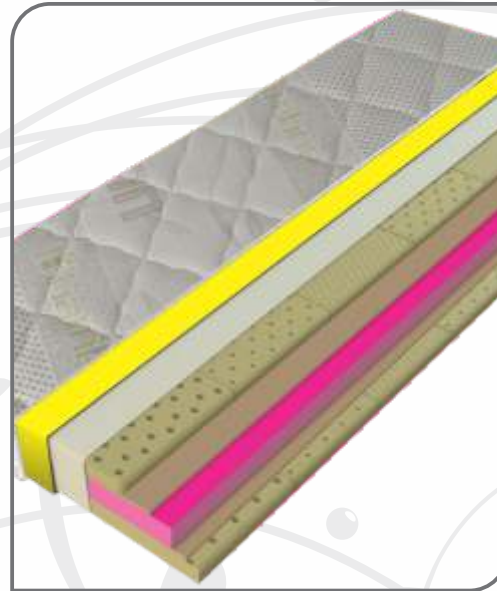

Its exceptional characteristics, durability, endurance, exceptional combination of high-quality materials, ideal density and hardness of the foam in the core, contribute to maximum pleasure and relaxation for the sleeper.

In the middle of the mattress is 10 cm of HIGH RESILIENT foam, a foam that belongs to one of the most modern foams that, with its unique structure and exceptional relationship between firmness and adaptability, gives your body optimal support.

A coconut board is placed on both sides of the HR foam, and 2 layers of 7 cm high LATEX on the surface of the mattress. The surface softness of the mattress on the upper side, and additional anatomical support for the body is provided by a built-in layer of visco memory foam.

The cover is stitched on the upper side with 1 cm of MEMORY FOAM, which achieves even greater surface pleasure for the sleeper, and on the lower side with 1 cm of PU FOAM.

A mattress that will delight even the most demanding users.

Removable cover (layer of memory foam 1 cm in the cover - both sides)
3D AIR MESH strip for a high degree of mattress transparency, enables better moisture exchange and a healthy micro climate for a beneficial feeling during sleep

Latex

LATEX is the highest quality mattress in the assortment of foam mattresses, but it is also one of the simplest.

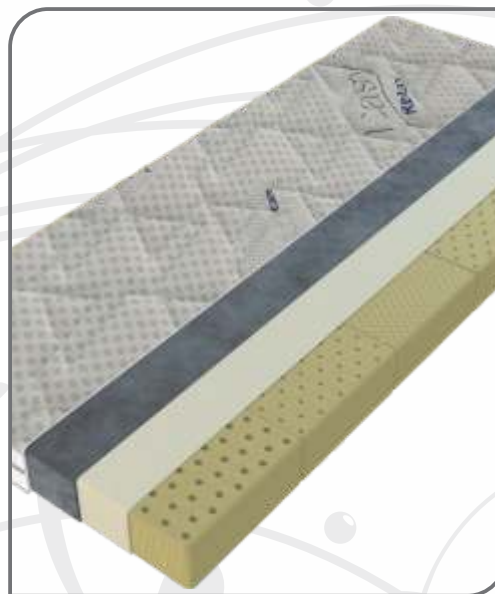

Latex is included in the group of hard mattresses. It is made entirely of latex foam, which is one of the most prestigious foams in mattress manufacturing today.

Latex foam has 7 anatomical comfort zones that allow for even distribution of body weight and provide optimal support and comfort. This foam is also characteristic in that it prevents the development of bacteria and mites.

The Latex mattress has a high-quality removable tufted cover, which contains anti-allergic and antibacterial protection that prevents the collection of bacteria and mites. The cover consists of 80% cotton and 20% polyester.

If you prefer firmer mattresses, then Latex is the right solution for you because it adapts to the shape of the body and enables quick relaxation, provides additional support to the spinal column and the entire muscle mass.

It evenly distributes the body weight in 7 zones, perfect for psychophysical rest.

Harmony

A mattress made of special HR foam, which has innovative anatomical zones in both the upper and lower layers, provides personalized support for every part of your body, and thanks to its high elasticity, it provides superior body support with surface softness and comfort.

A superior mattress has a core of premium 7-zone profiled HR foam, adapts perfectly to the contours of your body, guaranteeing a peaceful, quality and revitalizing sleep.

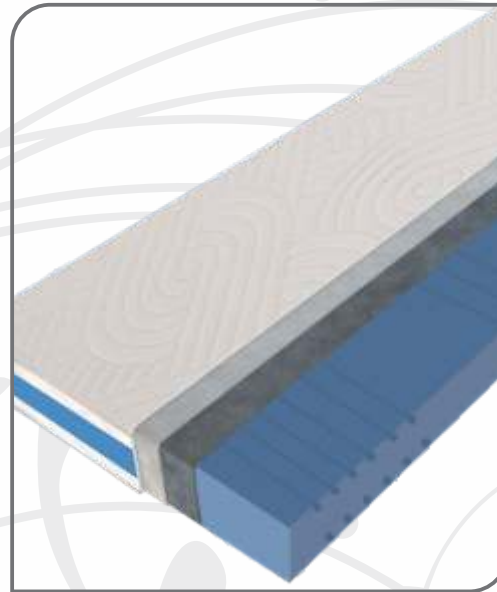

Thanks to the profiled structures of the lying part of the core, we can say that this mattress is also very important for preventing decubitis.

HR (high resilient) foam is cold-cast foam, a high-quality material, created on the principle of breaking dense foam cells.

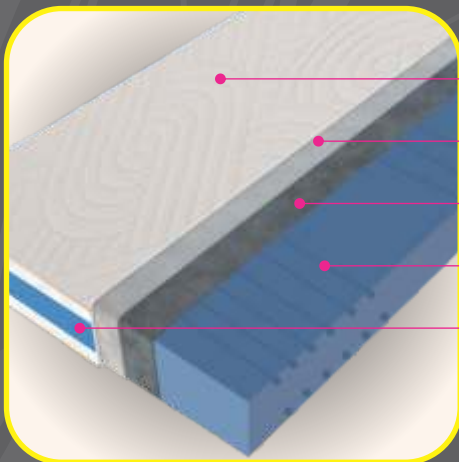

It provides exceptional elasticity, comfort and adaptability to different body positions, and thanks to the open structures of its cells, HR foam has better breathability and is more durable than standard PU foams.

The optimal comfort provided by this original cover, for which the hygienic aspect of the effects of harmful bacteria, is due to the 350 gr stretch knit, made on the basis of EXTRAFRESH treatment. In addition, thanks to the so-called ECORHYTMIC treatment of this fabric, the cover gets special properties for quick recovery of the body from accumulated daily stress

The HARMONY mattress is the way to ultimate comfort and regeneration of the body every night.

Duolatem

Unrepeatable orthopedic and medical support for the whole body. The perfect mattress for those who have an office and stressful job, frequent back pain, and it is especially recommended for athletes and people who lead an active life.

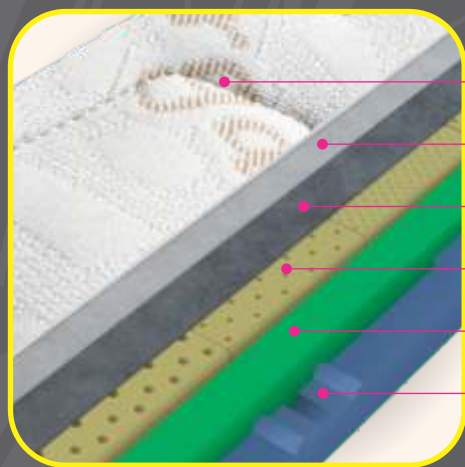

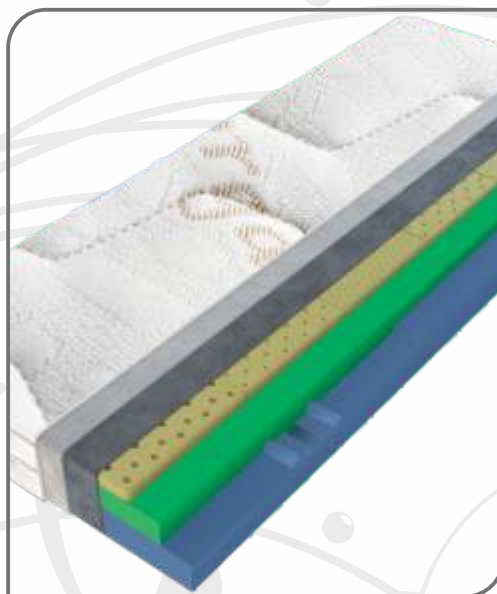

The **DUOLATEX** mattress is one of the highest quality and most comfortable mattresses in our entire assortment. If you want a hard, high-quality and comfortable mattress, then Duolatem is the right choice for you.

Duolatem consists of 3 types of foam, PU, Sky Cell and Latex foam.

The basis of the mattress is PU and Sky Cell foam, which give firmness to the mattress. The combination of PU and Sky Cell foam is an excellent basis for the mattress, because PU foam provides firmness and hardness to the mattress, while sky cell foam allows unhindered air circulation through the mattress.

Latex foam is placed on the upper side of the mattress at a height of 7 cm. The latex foam that is used in the production of Duolatem mattresses has 7 hardness zones, which provide better support for the body.

The Duolatem mattress has a quilted removable tufted cover with anti-allergic and antibacterial protection that prevents the collection of bacteria and mites.

Prestige

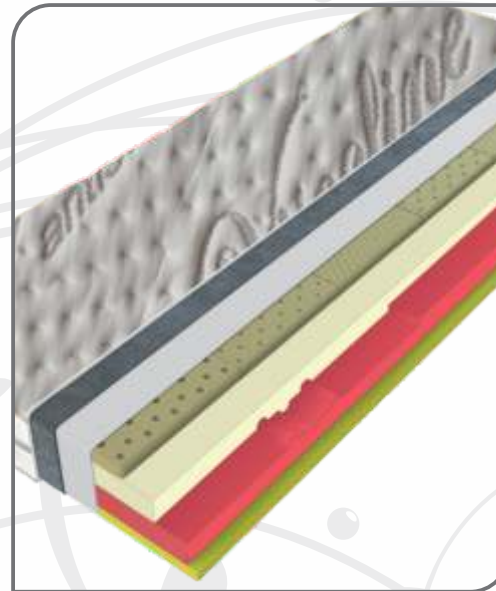

Top-quality double-sided mattress with an exclusive combination of materials that enables ideal rest and relaxation.

The **PRESTIGE** mattress is a double-sided mattress that belongs to the high category of mattresses, especially because of the materials used in its manufacture. It belongs to the group of hard elastic foam mattresses.

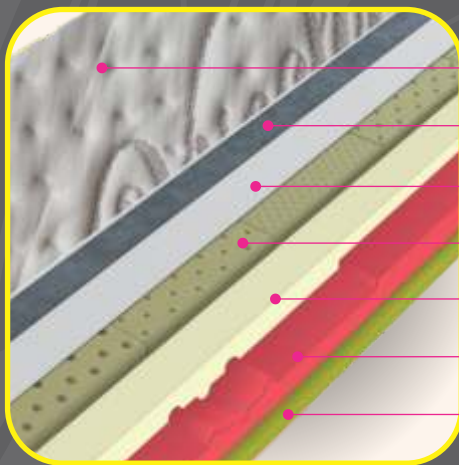

The structure of the mattress consists of as many as 4 types of foam that were used in its production. These are PU, Sky cell, Memory and Latex foam.

The base of the mattress is made of profiled PU and SKY CELL foam, of balanced density, while the final layers on the top and bottom are made of distinctive memory foam, if you want to fall asleep quickly and easily, or latex foam, if you want to get up easily, quickly return lost energy and a fresh and lively start to the working day.

The PRESTIGE mattress has a quality removable cover, which contains anti-allergic and antibacterial protection that prevents the accumulation of bacteria and mites. The cover consists of 80% cotton and 20% lycra.

Memoflex

If you want to buy a foam mattress that is not too hard, then **MEMOFLEX** is the ideal mattress for you. Memoflex is considered a mattress from the golden center because it is a combination of comfort, quality and affordable price.

Memoflex is one of the most popular mattresses, because it represents an excellent combination of mattress hardness and comfort. In terms of hardness, it belongs to the group of medium-hard foam mattresses.

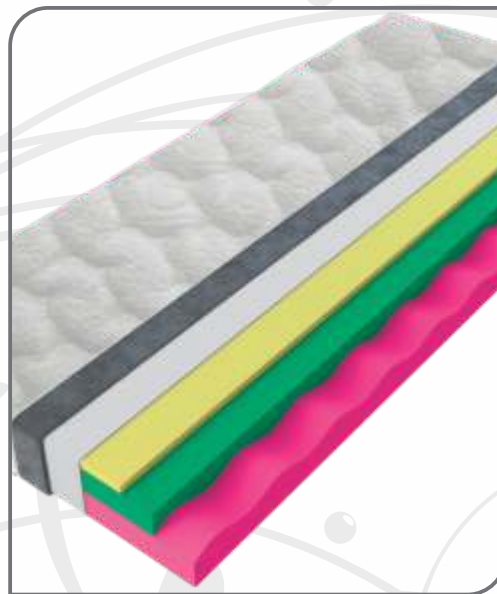

It consists of 3 types of foam: PU, Sky Cell and Memory foam.

The combination of PU and Sky Cell foam is an excellent basis for the mattress, because the PU foam provides firmness and hardness to the mattress, while the Sky cell foam allows for unhindered air circulation through the mattress.

Memoflex has a removable cover that provides anti-allergic protection. The cover consists of 80% cotton and 20% lycra.

Memoflex is a mattress that will allow you to quickly rest and relax from everyday duties and stress.

It is recommended for people who are exposed to increased exertions or increased stress during the day.

Memory

An excellent mattress that allows extremely precise adjustment of the shape of the body and provides a wonderful feeling of comfort and softness. An ideal solution for an extra bed.

MEMORY mattress consists of 2 types of foam: **Sky cell foam and memory foam.**

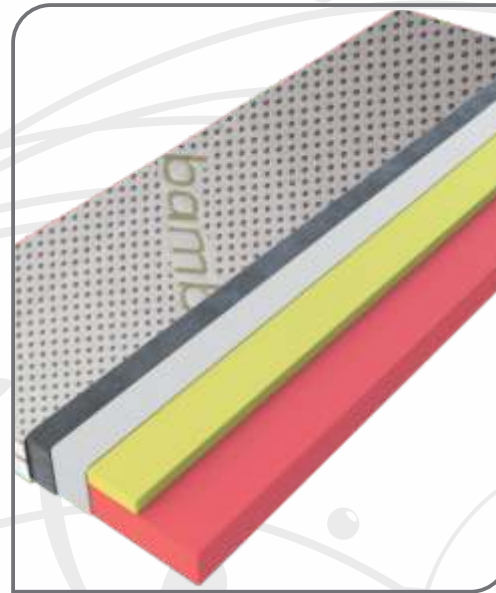

The base of the mattress consists of Sky cell foam at a height of 12 cm.

Memory foam is the final layer of this mattress and is placed at a height of 3cm.

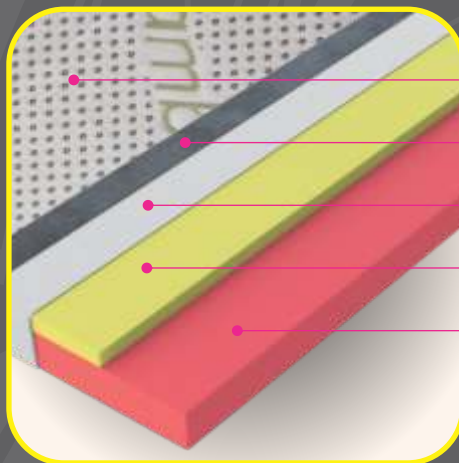

By adapting to the body, memory foam is an ideal sleeping surface, it relieves pressure in the points of contact between your body and the mattress and allows better circulation.

The Memory mattress can be packed in a roll, which makes it very convenient to transport. The memory mattress has a removable cover and is very practical for maintaining the hygiene of the mattress.

The memory mattress cover has anti-allergic and antibacterial protection, with BAMBOO fibers that give it an outstanding absorbent effect and excellent transparency.

Eco Soft

A mattress made of a combination of high-quality foams with an excellent density ratio and hardness. In the upper part of the mattress is SOFT foam, it provides excellent support for the body with surface softness and comfort, in the lower part of the mattress, Comfort foams 14 cm of greater density and hardness for superior sleep quality.

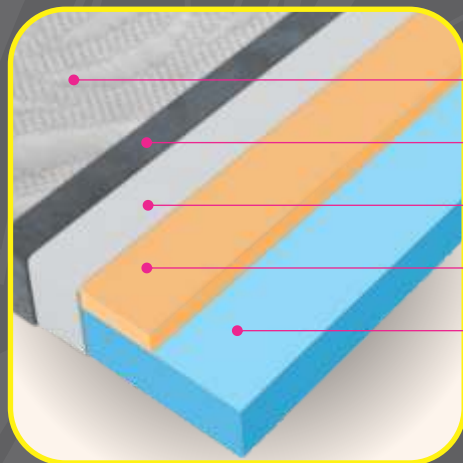

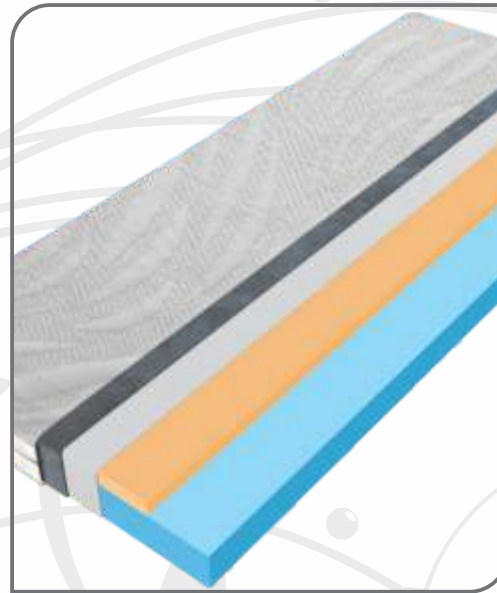

ECO SOFT mattress consists of two types of foam: Comfort foam 14 cm in the lower part, and Soft foam 4 cm in the upper part of the mattress.

Sleeping on the underside of the mattress, on polyurethane foam, provides optimal orthopedic support for the body in all positions during sleep, and thanks to its elasticity and density, ensures the sleeper's body exceptional relaxation and a high level of comfort.

Sleeping on the upper side of the mattress, on SOFT foam, provides greater surface softness and comfort, and while sleeping, provides extremely pleasant feelings of pressure relief in the body, and optimal psychological and emotional comfort.

Eco Soft mattress has a quality removable quilted cover that contains anti-allergic and antibacterial protection, which prevents the collection of bacteria and mites.

Topper

Regardless of what kind of existing bed you use, with the naddusek from the BONNELI range, you can significantly improve the comfort of your sleeping pad and ensure the comfort you are used to.

These multifunctional products that change your resting experience, in addition to providing a different sleep, can also be used as mattresses for extra beds. In addition, thanks to the fact that they are rolled up, they can be used as a practical solution for a product that you can take with you on vacations, trips...

When we sleep, we simply want to feel all the advantages of top-quality and high-quality materials without changing the entire mattress or bed at the same time... we decide on a mattress topper from the Bonnelli assortment.

toper Memory / Visco Memo

Memory H 7 cm (Visco memo 5 cm)

With a core made of memory foam at a height of 7 or 5 cm, it turns your existing bed into an extremely comfortable and soft bed.

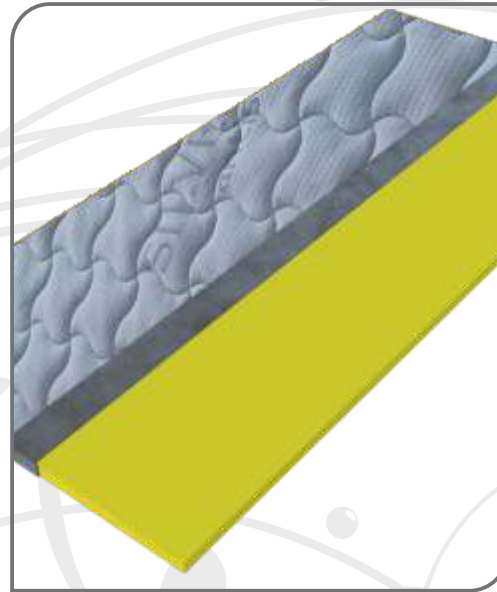

At the same time, thanks to the characteristics of the MEMORY foam and its anti-decubitus and thermoactive properties, it provides a feeling of complete comfort and relieves the body.

As a reaction to the temperature and pressure of the body, MEMORY foam adapts to the shape of the body, relieves you of tension and therefore enables the feeling of relaxation necessary for quality sleep.

The topper cover is made of antibacterial and anti-allergic treated canvas, which provides protection against dust mites and the development of bacteria and mold, enabling maximum hygiene of the environment, which increases the quality and durability of the topper cover.

Actual and easy to transport because it is packed in a roll.

It provides healthy, relaxing sleep and comfort at a high level, regardless of the quality of the underlying bed.

POCKET CORE

A more perfect and high-quality form of the core, it consists of springs with a smaller diameter, of which there are significantly more than in BONNEL cores. Each spring is individually sewn into the pockets and then connected to the core. Only loaded springs react to pressure, the core adapts to the body and movements during sleep as much as possible, and every part of the body has adequate support when lying down. This spring system provides the perfect environment for healthy sleep, provides optimal body support and a more restful sleep without much tossing and turning.

7 ZONE CORE

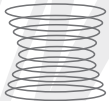

The principle of making multi-zone cores for mattresses was created as a result of the desire for even healthier body support and even more pronounced pressure relief. Ideal zonal support is created for each part of the body, in accordance with its different needs. The seven-zone core is extremely flexible, it has zones of different hardness, the parts where we are heaviest and which press the mattress the most (shoulders, hips, knees) are softer, the spine is perfectly supported and maintains its natural position, which is necessary for a healthy rest. Mattresses with 7-zone cores are especially suitable for people with a sensitive spine, the core gently adapts to the ideal position of your spine and ensures optimal relaxation of the body.

PANTERA PREMIUM FOAM

Innovative and superior foam, fulfilling the vision of the world's largest manufacturers to create a new generation of sustainable foams, with more renewable materials and less dependence on the petrochemical industry. Higher density and with special cell structures, in combination with appropriate zoning, an excellent solution for every mattress. What is perhaps the most important feature of this foam, not only that it provides a reduction in the number of pressure points on the body, and it also has a very high regulation of moisture and heat - which is very important in the prevention of decubitis.

BONNEL CORE

A wire core that provides as much support and flexibility as your body likes, without tiring or discomfort. For the production of springs is used a high-quality patented wire made of tempered steel with high resistance. The wire is 2.2 mm in diameter, the springs are interconnected by spirals with a high degree of flexibility, each spring is specially treated to achieve long-lasting elasticity and protection against breakage.

MEMORY FOAM

Innovative material that adapts to your body and remembers its shape. Material created in the NASA laboratory for the best protection and maximum comfort during space flights. Over time, it gained great popularity as a symbol of extremely healthy and relaxing sleep, the weight of the body is effectively distributed, pressure on the skin is reduced, circulation is improved and the load on the muscles and nervous system is reduced during sleep. It reacts perfectly to the temperature differences (micro climate) between the mattress and the sleeper, it helps you fall asleep quickly because, due to its great thermosensitivity, it adapts extremely precisely and gently to the contours of your body.

ORBIS FOAM

Revolutionary and flexible foam, higher density and ideal hardness, made from RENUVA™ polyol obtained from recycled POST-CONSUMER foam, using H&S technology. The internal structure of this foam makes it very elastic, and ORBIS keeps this elasticity permanently. Using the power of renewable materials, in addition to contributing to the protection and preservation of the environment, this foam provides a feeling of completeness comfort and superior comfort.

LATEX FOAM

Excellent quality material with improved properties compared to natural latex. Latex is a milky white liquid consisting of a specific rubber dispersed in water. Warm air is blown into this material to obtain a sundered rubber form-latex. LATEX belongs to the antibacterial and antiallergic ecological material, has great elasticity and flexibility and perfectly adapts to body pressure. All its exclusive properties are enhanced by perforations that further accelerate the flow of fresh air inside the mattress.

PU FOAM

Classic foam that began to be used in mattresses more than 40 years ago. In order to improve the quality of this material, new technological solutions are found in the processing and shaping of this foam, by adding various channels to increase the conductivity of air and moisture. PU foam belongs to foams with high technological characteristics and provides excellent support for your body..

SKY CELL FOAM

A type of polyurethane foam with open cells, created by a special technology, foam that is more durable and resistant to mechanical influences. The open cell system allows fresh air to pass through continuously and thus ensures continuous ventilation and a healthy climate for the sleeper. Thanks to these properties of SKY CELL Foam, vapors are not retained in the mattress, microorganisms, mites, mold and dust cannot develop in it, so a healthy sleep is guaranteed during the entire period of use.

HIGH RESILIENT FOAM

High-performance material characterized by high elasticity, exceptional tenacity and durability. A material with an exceptional ratio between strength and adaptability, resistant to any physical deformations. Thanks to its properties, primarily because of its strength and stability, it is also suitable for people with a higher body weight. One of the most modern types of foam, with its unique structure, a combination of unique anatomical support and comfort, gives the body optimal support, enables healthy sleep and guarantees the greatest possible comfort. Due to its special production technology and special cell structure, this foam is extremely elastic, provides much stronger support and distributes pressure more evenly, ensuring an ideal distribution of density and hardness.

SOFT FOAM

Foam that provides extra comfort.

3D FILTER 3D

Filter ecological fabric, improves air flow, prevents condensation and neutralizes heat.

ECOFILC

Ecological and completely healthy evolution of felt. ECOFILC is made from completely new, certified materials.

YUFLIN

Technology of special siliconized polyester fibers that make your mattress more comfortable.

ALOE VERA

The canvas, which contains essential oils of aloe vera, has an antibacterial effect and improves the functioning of the immune system. Due to the reaction to body heat, the positive properties of this miraculous plant come to the fore, the skin is renewed, rejuvenated and kept naturally moist. Aloe vera also has anti-inflammatory properties, has an anti-stress and soothing effect on the skin.

COCONUT BOARD

A natural material consisting of compressed coconut fiber soaked in Latex. Thus, their greater elasticity is achieved, and at the same time increases durability and durability, which makes them a perfect covering for the pocket core.

WOLL

Wool fibers are very resistant and strong, biodegradable and ecologically sustainable, so they also have the property of natural fire resistance. The material, which is naturally resistant to bacteria, has hypoallergenic properties and, in addition, the ability to provide high thermal insulation and moisture absorption.

COTTON

A completely natural plant fiber, absorbs moisture extremely well, and is also characterized by high resistance to bacteria, durability and easy maintenance. It provides a feeling of freshness to the sleeper's body, provides a relaxing environment and significantly improves the quality of sleep.

Q-DRY&SOFT TECHNOLOGY FOR MAKING CANVAS

The technology that provides stretch knitwear with superior quality and a perfect sleeping environment, at the same time makes the fabric softer, more elastic and softer to the touch. The canvas acquires the property of high hydrophilicity, the moisture is dispersed on a larger surface so that the canvas is wiped and dries more easily.

TENCEL FIBERS

Tencel fibers are natural cellulose fibers produced from the core of the eucalyptus tree. They have significantly greater strength and durability than cotton, while being as soft as silk and as delicate and airy as linen. These are natural antibacterial fibers resistant to the development of mites and microorganisms, and are especially suitable for people with sensitive skin. Tencel knitted fabric made of these fibers conducts moisture well and provides the skin with greater freshness and better breathing.

OEKO-TEX STANDARD

A strict certificate that guarantees that the fabric has been tested according to the highest European standards and confirmed as harmless and suitable for human use.

www.bonneli.co.rs
